THE ORDERS OF INSECTS THE CLASSIFICATION AND PHYLOGENY OF INSECTS The classification of insects has passed through many changes and with the growth of detailed knowledge an increasing number of orders has come to be recognized Handlirsch 1908 and Wilson and Doner 1937 have reviewed the earlier attempts at classification among which the schemes

of Brauer 1885 Sharp 1899 and Börner 1904 did much to define the more distinctive recent orders In 1908 Handlirsch published a more revolutionary system incorporating recent and fossil forms which gave the Collembola Thysanura and Diplura the status of three independent Arthropodan classes and considered as separate orders such groups as the Sialoidea Raphidioidea Heteroptera and Homoptera He also split up the old order Orthoptera gave its components ordinal rank and regrouped them with some of the other orders into a subclass Orthopteroidea and another subclass Blattaeformia
