underpinnings that have driven the Bush administration that have generally been viewed by Europeans as exceptional have been present in American politics since its earliest colonial beginnings with the Puritans and been carried forward by the ideological descendants of the Puritans from that time through the present In essence the form of American conservative exceptionalism exhibited during the Bush administration was present in American politics from the very beginning and has continued through the present albeit in a more extreme form since the traditional ideological conservatives currently dominate all three branches of the American government and the terror attacks of 9 11 allowed them to garner popular support for their exceptional programs Books In Print 2004-2005 Ed Bowker Staff,Staff Bowker, Ed,2004 **Statistical abstract of the United States: 2004-2005, The National Data Book (Paper)** , Provides tables and graphs of statistics on the social political and economic conditions of the United States Each section has an introductory text Each table and graph has a source note Appendix 1 includes guides to sources of statistics State statistical abstracts and foreign statistical abstracts Genocide, Ethnonationalism, and the United Nations Hannibal Travis,2013 Genocide Ethnonationalism and the United Nations examines a series of related crises in human civilization growing out of conflicts between powerful states or empires and indigenous or stateless peoples This is the first book to attempt to explore the causes of genocide and other mass killing by a detailed exploration of UN archives covering the period spanning from 1945 through 2011 Hannibal Travis argues that large states and empires disproportionately committed or facilitated genocide and other mass killings between 1945 and 2011 His research incorporates data concerning factors linked to the scale of mass killing and recent findings in human rights political science and legal theory Turning to potential solutions he argues that the concept of genocide imagines a future system of global governance under which the nation state itself is made subject to law The United Nations however has deflected the possibility of such a cosmopolitical law It selectively condemns genocide and has established an institutional structure that denies most peoples subjected to genocide of a realistic possibility of global justice lacks a robust international criminal tribunal or UN army and even encourages security cooperation among states that have proven to be destructive of peoples in the past Questions raised include What have been the causes of mass killing during the period since the United Nations Charter entered into force in 1945 How does mass killing spread across international borders and what is the role of resource wealth the arms trade and external interference in this process Have the United Nations or the International Criminal Court faced up to the problem of genocide and other forms of mass killing as is their mandate
