The American Design Adventure, 1940-1975

Arthur J. Pulos,1988 The American Design Adventure continues the fascinating and detailed examination of industrial design begun by Arthur Pulos in American Design Ethic The first volume discussed and illustrated the objects and artifacts the major designers and schools of design from Colonial times to the 1940s This second splendidly illustrated volume carries the story into the heroic era of American industrial design from the 1940s to the 1970s These were the decades of American industrial design s dominance when special exhibitions and world fairs made design a subject of national pride Big business realized the influence that trademarks packaging and corporate identity programs could have on their bottom line and the world of fashion created a consumer demand for name brands and well designed products Industrial design flourished under the capable hands of Raymond Loewy and Charles Eames while corporations like IBM RCA Herman Miller and Knoll were sponsors of the great American design adventure The extraordinary collection of illustrations that Pulos has assembled documents all of these important design trends while evoking the nostalgia of the 50s and 60s when Pop and Rock held sway Pulos probes all aspects of industrial designers and their work in education and private corporations in professional organizations and governmental agencies He also covers prefabricated housing graphics manufactured products from the exotic to the pragmatic and public systems from the sociopolitical to the economic Engineering & Building Record and the Sanitary

Engineer ,1887 **Wright on Exhibit** Kathryn Smith,2022-07-12 The first history of Frank Lloyd Wright s exhibitions of his own work a practice central to his career More than one hundred exhibitions of Frank Lloyd Wright s work were mounted between 1894 and his death in 1959 Wright organized the majority of these exhibitions himself and viewed them as crucial to his self presentation as his extensive writings He used them to promote his designs appeal to new viewers and persuade his detractors Wright on Exhibit presents the first history of this neglected aspect of the architect s influential career Drawing extensively from Wright s unpublished correspondence Kathryn Smith challenges the preconceived notion of Wright as a self promoter who displayed his work in search of money clients and fame She shows how he was an artist architect projecting an avant garde program an innovator who expanded the palette of installation design as technology evolved and a social activist driven to revolutionize society through design While Wright s earliest exhibitions were largely for other architects by the 1930s he was creating public installations intended to inspire debate and change public perceptions about architecture The nature of his exhibitions expanded with the times beyond models drawings and photographs to include more immersive tools such as slides film and even a full scale structure built especially for his 1953 retrospective at the Guggenheim Museum Placing Wright s exhibitions side by side with his writings Smith shows how integral these exhibitions were to his vision and sheds light on the broader discourse concerning architecture and modernism during the first half of the twentieth century Wright on Exhibit features color renderings photos and plans as well as a checklist of exhibitions and an illustrated catalog of extant and lost models made under Wright s supervision **Engineering Record, Building Record and Sanitary Engineer** ,1888 **Architecture and Building** ,1898 British Architect and Northern Engineer ,1893
