Annual Review Of Political Science Volume 1 Annual Review Of Political Science:

Annual Review of Political Science, Volume 1 Samuel Long,1986 **Annual Review of Political Science** ,2007 The mission of Annual review of political science is to provide systematic periodic examinations of the field through critical authoritative reviews The comprehensive critical review not only summarizes a topic but also roots out errors of fact or concept and provokes discussion that will lead to new research activity Each review contains title author s key words abstracts review and bibliography *Annual Review of Political Science, Volume 11* Levi Margaret,2008 **Emerging Technologies and International Stability** Todd S. Sechser,Neil Narang,Caitlin Talmadge,2021-11-28 Technology has always played a central role in international politics it shapes the ways states fight during wartime and compete during peacetime Today rapid advancements have contributed to a widespread sense that the world is again on the precipice of a new technological era Emerging technologies have inspired much speculative commentary but academic scholarship can improve the discussion with disciplined theory building and rigorous empirics This book aims to contribute to the debate by exploring the role of technology both military and non military in shaping international security Specifically the contributors to this edited volume aim to generate new theoretical insights into the relationship between technology and strategic stability test them with sound empirical methods and derive their implications for the coming technological age This book is very novel in its approach It covers a wide range of technologies both old and new rather than emphasizing a single technology Furthermore this volume looks at how new technologies might affect the broader dynamics of the international system rather than limiting the focus to a stability The contributions to this volume walk readers through the likely effects of emerging technologies at each phase of the conflict process The chapters begin with competition in peacetime move to deterrence and coercion and then explore the dynamics of crises the outbreak of conflict and war escalation in an environment of emerging technologies The chapters in this book except for the Introduction and the Conclusion were originally published in the Journal of Strategic Studies **American Fury** Myra Mendible,2024-02-12 Moral outrage is one of the most compelling complex and powerful emotional responses It is the affective currency that drives collective action in a democracy where it can rally constituents incentivize legislation affect how we vote and catalyze individual anger into righteous protests or mob rule In recent years outrage has bolstered extremism and political polarization and it spurred thousands of self prescribed patriots to storm the U S capitol But it also gave birth to new social justice groups such as Black Lives Matter and March for Our Lives and what began as an outraged tweet ultimately grew into the global MeToo movement This book offers the first interdisciplinary study of the myriad ways moral outrage is articulated invoked and mediated in contemporary U S society from feminist and indigenous politics climate activism and school curriculum debates to book banning alt right rhetoric literature and entertainment venues Setting its focus on the social dynamics and cultural effects of collective outrage these timely essays underscore its vital function as a galvanizing force in identity politics social change policymaking and civic

engagement Modernizing Democracy Matthias Freise,Thorsten Hallmann,2014-05-13 Modernizing Democracy brings together scholars focusing the role of associations and associating in contemporary societies Organizations and associations have been identified as the meso level of society and as the basic elements of democracy They are important providers of welfare services and play an important role between the individual and political spheres In recent years the environment of associations and associating has changed dramatically Individualization commercialization and globalization are challenging both democracy and the capability of associations to fulfill the functions attributed to them by social sciences This change provides the central question of the volume Is being part of an organization or association becoming an outdated model And do associations still have the capacity of modernizing societies or are they just outdated remnants of post democracy The contributions to Modernizing Democracy will be organized into Studying Association and Associating in the 21st Century Associating in Times of Post Democracy and Associations and the Challenge of Capitalist Development The book will be attractive to third sector researchers as well as a broader academic community of political scientists sociologists economists legal scientists and related disciplines *Information Sources in the Social Sciences* David Fisher,Sandra Price,Terry Hanstock,2018-02-19 No detailed description available for Information Sources in the Social Sciences From Religious Empires to Secular States Birol Başkan,2014-03-26 In the 1920s and the 1930s Turkey Iran and Russia vehemently pursued state secularizing reforms but adopted different strategies in doing so But why do states follow different secularizing strategies The literature has already shattered the illusion that secularization of the state has been a unilinear homogeneous and universal process and has convincingly shown that secularization of the state has unfolded along different paths Much however remains to be uncovered This book provides an in depth comparative historical analysis of state secularization in three major Eurasian countries Turkey Iran and Russia To capture the aforementioned variation in state secularization across three countries that have been hitherto analyzed as separate studies Birol Ba kan adopts three modes of state secularization accommodationism separationism and eradicationism Focusing thematically on the changing relations between the state and religious institutions Ba kan brings together a host of factors historical strategic and structural to account for why Turkey adopted accommodationism Iran separationism and Russia eradicationism In doing so he expertly demonstrates that each secularization strategy was a rational response to the strategic context the reformers found themselves in Public Policy, Governance and Polarization David K. Jesuit,Russell Alan Williams,2017-07-06 Polarization is widely diagnosed as a major cause of the decline of evidence based policy making and public engagement based styles of policy making It creates an environment where hardened partisan viewpoints on major policy questions are less amenable to negotiation compromise or change Polarization is not a temporary situation it is the new normal Public Policy Governance and Polarization seeks to provide a theoretical foundation for scholars and policy makers who need to understand the powerful and often disruptive forces that have arisen in Europe and North America over the past decade Academics and practitioners need to better

understand this growing trend and to find ways in which it may be managed so that policy solutions to these threats may be developed and implemented Researchers and future policymakers in fields such as public administration public management and public policy need to recognise how institutional design corporatist interest group systems and different pedagogical approaches may help them understand discuss and work beyond policy polarization Edited by two leading political science scholars this book aims to begin that process **Anthropology and Political Science** Myron J. Aronoff, Jan Kubik, 2013 What can anthropology and political science learn from each other The authors argue that collaboration particularly in the area of concepts and methodologies is tremendously beneficial for both disciplines though they also deal with some troubling aspects of the relationship Focusing on the influence of anthropology on political science the book examines the basic assumptions the practitioners of each discipline make about the nature of social and political reality compares some of the key concepts each field employs and provides an extensive review of the basic methods of research that bridge both disciplines ethnography and case study Through ethnography participant observation reliance on extended case studies and the use of anthropological concepts and sensibilities a greater understanding of some of the most challenging issues of the day can be gained For example political anthropology challenges the illusion of the autonomy of the political assumed by political science to characterize so called modern societies Several chapters include a cross disciplinary analysis of key concepts and issues political culture political ritual the politics of collective identity democratization in divided societies conflict resolution civil society and the politics of post Communist transformations Interdisciplinary Perspectives on International Law and International Relations Jeffrey L. Dunoff, Mark A. Pollack, 2013 Influential writers on international law and international relations explore the making interpretation and enforcement of international law *The Politics of Plant Closings* John Portz, 1990 A paper reprint of the 1988 original It is a political history that describes and analyzes the management of organized knowledge Wheatley takes Flexner and the Carnegie Foundation of 1910 as the model Portz political science Northeastern U combines a synthesis of the literature on urban politics and political economy with a close analysis of plant closings in Pittsburgh Pennsylvania Louisville Kentucky and Waterloo Iowa to illuminate the complexity of constraints upon and range of local government efforts to control the economic damage caused by shutdowns Paper edition unseen 12 95 Annotation copyrighted by Book News Inc Portland OR **The Palgrave Encyclopedia of Global Security Studies** , 2023-02-15 This encyclopedia provides an authoritative guide intended for students of all levels of studies offering multidisciplinary insight and analysis of over 500 headwords covering the main concepts of Security and Non traditional Security and their relation to other scholarly fields and aspects of real world issues in the contemporary geopolitical world *Research Design in Political Science* T. Gschwend, F. Schimmelfennig, 2007-10-23 When embarking on a new research project students face the same core research design issues This volume provides readers with practical guidelines for both qualitative and quantitative designs discusses the typical trade offs involved in choosing them and is rich in examples from

actual research **The Democratic Peace and Territorial Conflict in the Twentieth Century** Paul K. Huth, Todd L. Allee, 2002 Table of contents **Political Choice in Britain** Harold D. Clarke, 2004 Why do people vote as they do Indeed why do they vote at all What do they think about elections and democracy This book addresses these questions by focusing on the explanatory power of rival sociological and individual rationality models *Prospect Theory and Foreign Policy Analysis in the Asia Pacific* Kai He, Huiyun Feng, 2013 Why does North Korea behave erratically in pursuing its nuclear weapons program Why did the United States prefer bilateral alliances to multilateral ones in Asia after World War II Why did China become nice no more military coercion in dealing with the pro independence Taiwan President Chen Shuibian after 2000 Why did China compromise in the negotiation of the Chunxiao gas exploration in 2008 while Japan became provocative later in the Sino Japanese disputes in the East China Sea North Korea's nuclear behavior U S alliance strategy China's Taiwan policy and Sino Japanese territorial disputes are all important examples of seemingly irrational foreign policy decisions that have determined regional stability and Asian security By examining major events in Asian security this book investigates why and how leaders make risky and seemingly irrational decisions in international politics The authors take the innovative step of integrating the neoclassical realist framework in political science and prospect theory in psychology Their analysis suggests that political leaders are more likely to take risky actions when their vital interests and political legitimacy are seriously threatened For each case the authors first discuss the weaknesses of some of the prevailing arguments mainly from rationalist and constructivist theorizing and then offer an alternative explanation based on their political legitimacy prospect theory model This pioneering book tests and expands prospect theory to the study of Asian security and challenges traditional expected utility based rationalist theories of foreign policy behavior *Annual Review of Political Science, Volume 2* Samuel Long, 1987 *Book Review Index*, 1981 Every 3rd issue is a quarterly cumulation *Annual Review of Political Science. Vol. 12, 2009* Margaret Levi, Simon Jackman, Nancy Lipton Rosenblum, 2009-06
