Symposium on Radiation Effects on Materials - Volume 1 ,1958 Report of Investigations ,1962 **The Picture Book of Quantum Mechanics** Siegmund Brandt,Hans D. Dahmen,2012-12-06 In studying classical mechanics students are often helped by the fact that intuitions developed in everyday life can give one a good idea of the behavior of the idealized objects dealt with in introductory courses In addition equations encountered are sufficiently simple to solve even in relatively complex situations that students can further develop their intuition by solving problems In learning quantum theory however intuitions developed for the classical world fail and the equations to be solved are sufficiently complex that they can readily be solved without a computer only for the simplest situations This book represents an attempt to jump the hurdle to an intuitive understanding of wave mechanics by using illustrations profusely to present the time evolution and parameter dependence of wave functions in a wide variety of situations Most of the illustrations are computer generated solutions of the Schrödinger equation for one and three dimensional systems The situations discussed range from the simple particle in a box through resonant scattering in one dimension to the hydrogen atom and Regge classification of resonant scattering This edition has been thoroughly revised and expanded to include a discussion of spin and magnetic resonance Associations' Publications in Print ,1981 1981 in 2 v v 1 Subject index v 2 Title index Publisher title index Association name index Acronym index Key to publishers and distributors abbreviations Foundations of Space Biology and Medicine: Space as a habitat ,1975
