the life of an annual is limited to just 12 months and so you must not expect them to grow up and bloom again the next year unless of course you allowed the seeds to lie in the bed without collecting them That is when they are going to bloom up just like weeds with a little bit of rain and with the coming of the spring One of the great advantages of annuals is that they are quite easy to grow and flourish in your garden over a long period The most common are well known to even amateur gardeners who can recognize a cornflower nasturtiums Virginia stock and Candytuft These are very beautiful in themselves but every gardener is growing them in his garden So be a little adventurous and grow annuals that are lesser known whose names you will find in seed catalogs nursery catalogs and in nurseries online There are two kinds of annuals the hardy kind and the half hardy kind The hardy annuals are sown out of doors either in the autumn or in the spring The half hardy annuals are normally raised in frames or under cloches if you are subject to a continuous frost Half hardy annuals may need a little bit more of extra care and coddling but that extra is going to be worth it when you see the blossoms in your garden
