Deuster, 2002-04-23 Inhaltsangabe Abstract The growing or at least steady stream of literature that has been published in
recent years on the variety of issues known as strategic management both in the form of books and journal articles some of
them more some less scientific is ample evidence of the interest the management community takes in the subject Likewise
game theory has experienced a surge in popularity not only because the 1994 Nobel prize was awarded to JOHN HARSANYI
JOHN NASH and REINHARD SELTEN for their contribution to the refinement of game theory but also with regard to the
influence it has had on the social sciences during the last two decades primarily on economics but also on other fields such as
psychology or political science Surprisingly however there is little if any literature available on the combination of game
theory and strategic management even though game theory is concerned with finding solutions to strategic problems its
terminology bargaining power cooperation etc also being very suggestive of applications to business strategy The consequent
question then has to be is there a need to investigate the subject further and why might it be beneficial Strategy is a wide
field and so is game theory Therefore the purpose of this essay cannot possibly be to explore the intricacies game theory has
to offer nor can it be to investigate the depths of strategic management Rather it is to examine whether game theory can be
fruitfully applied to the problems faced within strategic management In order to further narrow the topic down there are
various angles from which to approach strategic management and game theory For instance one way might be to assume
that underlying strategic management as an academic discipline are various fundamental questions which game theory is
prepared to answer One such question is How do firms behave Alternatively one might view game theory as a set of tools
assisting the strategist in finding practical solutions to specific problems within a strategic context Here one could think of
Should we enter this particular market in order to challenge the incumbent firm or How can we deter our competitors from
starting a price war How should we organise the process of strategy formation and the like In this paper my emphasis will be
on the latter approach in the style of Can game theory assist the general manager in coping with strategic issues arising from
