Allure of the Incomplete, Imperfect, and Impermanent Rumiko Handa, 2014-12-17 Architects have long operated based on the assumption that a building is complete once construction has finished Striving to create a perfect building they wish for it to stay in its original state indefinitely viewing any subsequent alterations as unintended effects or the results of degeneration The ideal is for a piece of architecture to remain permanently perfect and complete This contrasts sharply with reality where changes take place as people move in requirements change events happen and building materials are subject to wear and tear Rumiko Handa argues it is time to correct this imbalance Using examples ranging from the Roman Coliseum to Japanese tea rooms she draws attention to an area that is usually ignored the allure of incomplete imperfect and impermanent architecture By focusing on what happens to buildings after they are complete she shows that the afterlife is in fact the very life of a building However the book goes beyond theoretical debate Addressing professionals as well as architecture students and educators it persuades architects of the necessity to anticipate possible future changes and to incorporate these into their original designs

on ecologically and socially responsible design **Architecture and the Nazi Cultural Landscape** David H. Haney, 2022-09-13 This book traces cultural landscape as the manifestation of the state and national community under the Nazi regime and how the Nazi era produced what could be referred to as a totalitarian cultural landscape For the Nazi regime cultural landscape was indeed a heritage resource but it was much more than that cultural landscape was the nation The project of Nazi racial purification and cultural renewal demanded the physical reshaping and reconceptualization of the existing environment to create the so called new Nazi cultural landscape One of the most important components of this was a set of monumental sites thought to embody blood and soil beliefs through the harmonious synthesis of architecture and landscape This special group of landscape bound architectural complexes was interconnected by the new autobahn highway system itself thought to be a monumental work embedded in nature Behind this intentionally aestheticized view of the nation as cultural landscape lay the all pervasive system of deception and violence that characterized the emerging totalitarian state This is the first historical study to consider the importance of these monumental sites together with the autobahn as evidence of key Nazi cultural and geographic strategies during the pre war years This book concludes by examining racial and nationalistic themes underlying cultural landscape concepts today against this historic background Art Appreciation for Children William Garrison Whitford, Edna B. The Modern Garden Pierluigi Serraino, 2024-10-01 Visionary landscape architecture and garden design at mid century in North America is captured by the greats of the era including Julius Shulman and Ezra Stoller in many previously unpublished photographs The treasures of mid century American architecture have long been celebrated Less appreciated has been the landscape design that provides the framing for these masterworks But more than frame landscape architecture is an art worthy of the spotlight particularly at mid century when the notion that gardens are outdoor spaces for people to live in was championed and brought to the fore now gardens and landscapes are not just external attributes to the house but a continuation of it and its living spaces in a relationship of symbiosis with its pools and terraces its winding lawns and its partly enclosed room like spaces flanked by brick or stone or plantings in a range of colors and forms Approximately seventy five mostly residential projects are thoroughly documented and recounted Landscape architects whose work is featured include Thomas Church Lawrence Halprin and Garrett Eckbo among others Highlights include the dramatic surrounds of Richard Neutra s Perkins House in its Pasadena hillside setting and Frank Lloyd Wright s Marin County Civic Center where environment and building comeingle in an extraordinary modernist vision of the future made real This book is both a wishful gesture toward a realignment of building with nature and a must have for anyone with a visceral appreciation for a designed environment understood as an integrated whole Ultimately the book underlines the fundamental importance of gardens and landscape design intended in the widest possible sense for the quality of living of all individuals The Arts J. Architectural Conservation in Asia John H. Stubbs,Robert G. Thomson,2016-11-10 The first comprehensive overview of architectural conservation in Asia Internationally renowned author John Stubbs follows up on the success of his previous volumes Time Honored A Global View of Architectural Conservation and Architectural Conservation in Europe and the Americas Architectural conservation is a rapidly expanding and under researched field in Asia and is international experts are often brought in making the subject of considerable interest to international academics Boxes and case studies by local experts add depth and interest to the authors meticulous research A website with extra information and resources accompanies the series <http://conservebuiltworld.com> **The Social Imperative** H. Koon Wee,2021-07-21 This book contains multiple short critiques reflections and manifestos affording each contributing architect and intellectual the time and space to imagine new social paradigms in China Emerging from a tumultuous history of high culture and complex territorial conditions there is nothing straightforward about the social development of China The complexity of the social practices developed by architects and shapers of the built environment can be explained in part by the last three decades of an intensified adoption of the market economy by the Communist Party of China after an equally short three decades of closed door communist control There is no political meltdown like the democratization of the former Communist Bloc but there is a constant managing of discontent and resistance across China At the apex of the many creative and intellectual forces in China architects harbor and give form to many tactics of resistance Unfortunately architects are also the instruments and minds complicit with profit mongering developers and governments pursuing unchecked urbanization degradation of the environment exploitation of the marginalized and the creation of a very inequitable China This book begins with an introduction that defines the forms and tendencies of China s society as it stands today and it positions the

work of a small number of architects and intellectuals who are at the forefront of reforming rethinking and even revolutionizing the Chinese society Beneath the veneer of a very successful China that the world readily acknowledges a quiet revolution is taking place within the realms of architecture and the city The social architectural and urban theories documented in this book are organized around the established canons of social actions from mobilizing laboring resisting and mediating to networking controlling rationalizing and aestheticizing This book aims to put the social agenda squarely back in the rapid development of the built environment in China This publication is the culmination of a three year study of social issues in the architecture and cities of China It involved visits to sites undergoing massive change discussions and debates among architects and critics reflections by practitioners about their own work and activists lobbying for social change Supported by the non profit AA Asia the edition of the contents relied heavily on original input and exchanges between architects and theorists committed to China from Asia and beyond Since the 1990s AA Asia remains one of a few unique think tanks committed to the study of architecture and cities in Asia As an advocacy with strong academic roots it seeks to establish the differences across various postcolonial and Asian contexts and recalibrate the role of architecture in a technocratic era dominated by the global economy With Contributions of Robert Adams Lee Ambrozy Yung Ho Chang Chen Ling Jeremy Chia Cui Kai Dong Gong Dong Yugan Mario Gandelsonas Han Tao Andrei Harwell He Jianxiang Hu Yan Hua Li Huang Weiwen Huang Wenjing Jiang Jun Jeffrey Johnson Michael Kokora Kengo Kuma Andrew Lee Joan Leung Lye Li Han Li Hu Li Shiqiao Nartano Lim William S W Lim Liu Jiakun Liu Kecheng Liu Yichun Long Ying Ma Qingyun Robert Mangurian Meng Yan Ou Ning Alan Plattus Mary Ann Ray Daan Roggeveen Ruan Hao Eunice Seng Shi Jian Victor Su Sun Yimin Wang Fei Wang Shu Wang Yan H Koon Wee Shirley Woo Wu Gang Wu Liangyong Xu Tiantian Rocco Yim Yu Kongjian Zhang Ke Zhao Liang Zhou Yi Zhu Tao Zhu
