Scott (joint author.), 1969 **Triangulating Methodological Approaches in Corpus Linguistic Research** Paul Baker, Jesse Egbert, 2016-06-10 Contemporary corpus linguists use a wide variety of methods to study discourse patterns This volume provides a systematic comparison of various methodological approaches in corpus linguistics through a series of parallel empirical studies that use a single corpus dataset to answer the same overarching research question Ten contributing experts each use a different method to address the same broadly framed research question In what ways does language use in online Q A forum responses differ across four world English varieties India Philippines United Kingdom and United States Contributions will be based on analysis of the same 400 000 word corpus from online Q A forums and contributors employ methodologies including corpus based discourse analysis audience perceptions Multi Dimensional analysis pragmatic analysis and keyword analysis In their introductory and concluding chapters the volume editors compare and contrast the findings from each method and assess the degree to which triangulating multiple approaches may provide a more nuanced understanding of a research question with the aim of identifying a set of complementary approaches which could arguably take into account analytical blind spots Baker and Egbert also consider the importance of issues such as researcher subjectivity type of annotation the limitations and affordances of different corpus tools the relative strengths of qualitative and quantitative approaches and the value of considering data or information beyond the corpus Rather than attempting to find the best approach the focus of the volume is on how different corpus linguistic methodologies may complement one another and raises suggestions for further methodological studies which use triangulation to enrich corpus related research *The Palgrave Handbook of Applied Linguistics Research Methodology* Aek Phakiti, Peter De Costa, Luke Plonsky, Sue Starfield, 2018-11-19 This Handbook provides a comprehensive treatment of basic and more advanced research methodologies in applied linguistics and offers a state of the art review of methods particular to various domains within the field Arranged thematically in 4 parts across 41 chapters it covers a range of research approaches presents current perspectives and addresses key issues in different research methods such as designing and implementing research instruments and techniques and analysing different types of applied linguistics data Innovations challenges and trends in applied linguistics research are examined throughout the

Handbook As such it offers an up to date and highly accessible entry point into both established and emerging approaches that will offer fresh possibilities and perspectives as well as thorough consideration of best practices This wide ranging volume will prove an invaluable resource to applied linguists at all levels including scholars in related fields such as language learning and teaching multilingualism corpus linguistics critical discourse analysis discourse analysis and pragmatics language assessment language policy and planning multimodal communication and translation

A Linguistic Approach to Revelation 19:11-20:6 and the Millennium Binding of Satan Alan E. Kurschner,2022-08-22 This study argues that the establishment of the millennium binding of Satan and the vindication of the saints in Revelation 20 1 6 are cohesively linked with Jesus s victorious battle in Revelation 19 11 21 The major implication of this analysis views both these events as consequent effects of Christ s victory at the eschatological battle Applying systemic functional linguistics and discourse analysis of cohesion this study advances critical scholarship on the Book of Revelation by offering the first fully sustained answer to this frequently debated question regarding Satan s binding from a modern linguistic approach

Entity-Relationship Approach - ER '93 Ramez A. Elmasri, 1994-07-28 This monograph is devoted to computational morphology particularly to the construction of a two dimensional or a three dimensional closed object boundary through a set

of points in arbitrary position. By applying techniques from computational geometry and CAGD, new results are developed in four stages of the construction process: a) the gamma neighborhood graph for describing the structure of a set of points; b) an algorithm for constructing a polygonal or polyhedral boundary based on a; c) the flintstone scheme as a hierarchy for polygonal and polyhedral approximation and localization; d) and a Bezier triangle based scheme for the construction of a smooth piecewise cubic boundary.
