

The Standard Model of Particle Physics

- By early 70's, it was clear that hadrons (baryons and mesons) are not fundamental point-like objects
- But leptons did not show any evidence of internal structure
 - Even at the highest energies they still do not show any structure
 - Can be regarded as elementary particles
- The phenomenological understanding along with observation from electron scattering (Deep Inelastic Scattering, DIS) and the quark model
- Resulted in the Standard Model that can describe three of the four known forces along with quarks, leptons and gauge bosons as the fundamental particles
