J.H. Retinger European Cultural Centre, European cultural centre, 1960 Russian Archaism Irina Shevelenko, 2024-08-15

Russian Archaism considers the aesthetic quest of Russian modernism in relation to the nation building ideas that spread in the late imperial period. Irina Shevelenko argues that the cultural milieu in Russia where the modernist movement began as an extension of Western trends at the end of the nineteenth century soon became captivated by nationalist indoctrination. Members of artistic groups, critics and theorists advanced new interpretations of the goals of aesthetic experimentation that would allow them to embed the nation building agenda within the aesthetic one. Shevelenko's book focuses on the period from the formation of the World of Art group 1898 through the Great War and encompasses visual arts, literature, music and performance. As Shevelenko shows, it was the rejection of the Russian westernized tradition informed by the revival of populist sensibilities across the educated class that played a formative role in the development of Russian modernist agendas, particularly after the 1905 revolution. Russian Archaism reveals the modernist artistic enterprise as a crucial source of insight into Russia's political and cultural transformation in the early twentieth century and beyond.

Debussy's Legacy and the Construction of Reputation Marianne Wheeldon, 2017. Today Claude Debussy's position as a central figure in twentieth century concert music is secure and scholarship has long taken for granted the enduring musical and aesthetic contributions of his compositions. Yet this was not always the case. Unknown to many concertgoers and music scholars is the fact that for years after his death, Debussy's musical aesthetic was perceived as outmoded, decadent and even harmful for French music. In *Debussy's Legacy and the Construction of Reputation*, Marianne Wheeldon examines the vicissitudes of the composer's posthumous reception in the 1920s and 30s and analyzes the confluence of factors that helped to overturn the initial backlash against his music. Rather than viewing Debussy's artistic greatness as the cause of his enduring legacy, she considers it instead as an effect, tracing the manifold processes that shaped how his music was received and how its aesthetic worth was consolidated. Speaking to readers both within and beyond the domain of French music and culture, *Debussy's Legacy and the Construction of Reputation* enters into dialogue with research in the sociology of reputation and commemoration, examining the collective nature of the processes of artistic consecration. By analyzing the cultural forces that came to bear on the formation of Debussy's legacy, Wheeldon contributes to a greater understanding of the inter-war period, the cultural politics, debates and issues that confronted musicians in 1920s and 30s Paris, and offers a musicological perspective on the subject of reputation building to date underrepresented in recent writings on reputation and commemoration in the humanities. *Debussy's Legacy and the Construction of Reputation* is an important new study, groundbreaking in its methodology and in its approach to musical influence and cultural consecration.
