Magdala/Taricheae Bruno Callegher, 2023-08-14 On a monetary basis Magdala must be considered as one of the most important and active settlements between the 1st century BC and most of the 3rd century AD on Lake Kinneret a place of

production and trade of supply for military forces certainly in contact with other trading centres probably located on the Mediterranean coast however in a market perspective quite different from our current experience and even from the semantic content of this word often abused with a semantic extension that does not correspond to the experience of the ancients Its monetary decline started on the early 4th century when the economic and monetary strategies of the Constantinian era shifted the flow of money to other routes especially between the great port cities of the Mediterranean The welcome contribution of Callegher s study derives from the new data published which allows us to overcome clichés and a stereotypical view of both the archaeological site and the economy of the Upper Galilee Byzantine Coins Philip Grierson,1982

Arab-Byzantine Relations in Early Islamic Times Michael Bonner,2017-09-08 The Byzantine Empire was the Islamic commonwealth s first and most stubborn adversary For many centuries it loomed large in Islamic diplomacy military operations and commerce as well as in Islamic representations of the world in general Moreover the ways in which early Muslims and Byzantines perceived one another both polemically and otherwise afterwards proved decisive for the mutual perceptions between the Islamic world and Christian Western Europe For these and other reasons Arab Byzantine relations have been a major concern of modern scholarship on early Islam for well over a century Arab Byzantine Relations in Early Islamic Times presents some of the most important of these contributions organized according to the following themes war and diplomacy frontiers and military organization polemics and images of the other exchange influence and convergence and martyrdom jihad and holy war An introductory essay discusses these themes within the contexts of early Islamic society politics and economy

Byzantium and the Early Islamic Conquests Walter E. Kaegi,1995-03-30 This is a study of how and why the Byzantine Empire lost many of its most valuable provinces to Islamic Arab conquerors in the seventh century provinces which included Syria Palestine Mesopotamia and Armenia It investigates conditions on the eve of those conquests mistakes in Byzantine policy toward the Arabs the course of the military campaigns and the problem of local official and civilian collaboration with the Muslims It also seeks to explain how after terrible losses the Byzantine government achieved some intellectual rationalisation of its disasters and began the complex process of transforming and adapting its fiscal and military institutions and political controls in order to prevent further disintegration

Egypt and the Eastern Mediterranean World Jelle Bruning,Janneke H. M. de Jong,Petra M. Sijpesteijn,2022-12-15 During the period 500 1000 CE Egypt was successively part of the Byzantine Persian and Islamic empires All kinds of events developments and processes occurred that would greatly affect its history and that of the eastern Mediterranean in general This is the first volume to map Egypt s position in the Mediterranean during this period Drawing on a wide range of disciplines the individual chapters detail its connections with imperial and scholarly centres its role in cross regional trade networks and its participation in

Mediterranean and Near Eastern cultural developments including their impact on its own literary and material production. With unparalleled detail the book tracks the mechanisms and structures through which Egypt connected politically, economically and culturally to the world surrounding it. **Ancient Coins of the Graeco-Roman World** Colin M. Kraay, 1984. Revised versions of papers presented at the Nickle Conference held in the Nickle Arts Museum of the University of Calgary Oct 19-23 1981. *Economic Expansion in the Byzantine Empire, 900-1200* Alan Harvey, 2003-10-30. In this book Dr Harvey shows that if we broaden our comprehension of feudalism the economic developments of the Byzantine Empire and of the medieval west were far more comparable than Byzantine historians have been prepared to admit. Previous interpretations have linked economic trends too closely to the political fortunes of the state and have consequently regarded the twelfth century as a period of economic stagnation. Yet there is considerable evidence that the empire's population expanded steadily during the period covered by this book and that agricultural production was intensified. A wealth of evidence serves to reinforce the point that the disintegration of the empire in the late twelfth century should no longer be associated with economic decline. Dr Harvey's conclusions in particular that there is no incompatibility between the development of the landed wealth of a feudalising aristocracy and the growth of commerce and urbanisation will affect all future interpretations of Byzantine history.
