Jeffrey I. Rose, 2022-05-18 This textbook explores the mystery of human origins in the Arabian Peninsula the lost Southern Crescent where humanity took its first steps toward civilization Under Arabia's surface of sand and stone lies a primordial realm of rolling grasslands freshwater lakes and river floodplains This book aims to restore a critical missing chapter in the prehistory of our species that played out in this forgotten place of plenty The author has carried out more than twenty years of fieldwork in Yemen and Oman weaving his research together into an unorthodox tapestry of archaeology environmental science genetics and Middle Eastern mythology This volume peers beneath Arabia's abandoned deserts revealing a land that once served as a bridge between prehistoric worlds This textbook is suitable for undergraduate and graduate students as well as all readers who are interested in learning about Arabian prehistory **Proceedings of the Seminar for Arabian Studies Volume 49 2019**

Peter Magee, 2014-05-19 This book provides the first extensive coverage of the archaeology of the Arabian peninsula from c 9000 to 800 BC Providing a wealth of detail on the environmental and archaeological record it argues that this ancient region was in many ways very different from the surrounding states in Egypt and Mesopotamia It examines the adaptation of humans to Arabia's environment and the eventual formation of a unique society that flourished for millennia *Saudi Arabia*

Antiquity George Hatke, Ronald Ruzicka, 2021-02-01 South Arabia is one of the least known parts of the Near East. It is primarily due to its remoteness coupled with the difficulty of access that South Arabia remains so under explored. In pre-Islamic times however it was well connected to the rest of the world. Due to its location at the crossroads of caravan and maritime routes pre-Islamic South Arabia linked the Near East with Africa and the Mediterranean with India. The region is unique in that it has a written history extending as far back as the early first millennium BCE, a far longer history than that of any other part of the Arabian Peninsula. The papers collected in this volume make a number of important contributions to the study of the history and languages of ancient South Arabia as well as the history of South Arabian studies and will be of interest to scholars and laypeople alike.

The 2018 Archaeological Survey at Tawi Said, Sultanate of Oman Stephanie Döpper, Irini Biezeveld, Maria Pia Maiorano, Jonas Kluge, 2024-03-07 The 2018 archaeological survey at Tawi Said located on the edge of the Sharqiyah desert in the Sultanate of Oman yielded close to 8 600 artifacts, the majority being pottery sherds. Two significant phases are attested by the survey's finds: the Wadi Suq period (2000–1600 BCE) and the Late Islamic period (1650–1970 CE).

Oman and Muscat Patricia Risso, 2016-02-12 During the early modern period Oman held a key position in the trade routes whereby the Muslim world dominated indigenous trade in the Indian Ocean. In the second half of the eighteenth century Oman broke free from foreign political control and became the dominant economic and naval force in the western Indian Ocean and the Gulf. This was a golden age for Omanis when their economic power and political prestige were at their height. This study, first published in 1986, presents a detailed comprehensive history of this important period and includes tribal politics, the role of religion, and Oman's relations with neighbouring areas such as Persia and East Africa. The era ends with the political and maritime pressures exerted on Oman by Britain and France and the territorial pressures exerted by the Wahhabi Arabians.

Rose, 2009-11-27 The romantic landscapes and exotic cultures of Arabia have long captured the interests of both academics and the general public alike The wide array and incredible variety of environments found across the Arabian peninsula are truly dramatic tropical coastal plains are found bordering up against barren sandy deserts high mountain plateaus are deeply incised by ancient river courses As the birthplace of Islam the recent history of the region is well documented and thoroughly studied However legendary explorers such as T E Lawrence Wilfred Thesiger and St John Philby discovered hints of a much deeper past during their travels across the subcontinent Drawn to Arabia by the magnificent solitude of its vast sand seas these intrepid adventurers learned from the Bedouin how to penetrate its deserts and returned with stirring accounts of lost civilizations among the wind swept dunes We now know that prior to recorded history Arabia housed countless peoples living a variety of lifestyles including some of the world's earliest pastoralist communities of incipient farmers fishermen dubbed the Ichthyophagi by ancient Greek geographers and Paleolithic big game hunters who were among the first humans to depart their ancestral homeland in Africa In fact some archaeological investigations indicate that Arabia was inhabited by early hominins extending far back into the Early Pleistocene perhaps even into the Late Pliocene
