A Post-Exotic Anthropology of Soqatra, Volume II Serge D. Elie, 2020-06-22 This two volume book offers a panoramic explanatory narrative of Soqatra Island's rediscovery based on the global significance of its endemic biodiversity The first volume *A Post Exotic Anthropology of Soqatra A Mesography of an Indigenous Polity in Yemen* initiated the analytical inventory of the four key vectors of Soqatra's transition process through a discussion of the first two economic disarticulation and political incorporation This volume *A Post Exotic Anthropology of Soqatra Cultural Environmental Annexation of an Indigenous Community* completes the analytical inventory by exploring the other two pivotal vectors of transition cultural modernization and environmental annexation These two vectors encompass the critical sociocultural spheres and environmental domains in which Soqatra's transformation process is unfolding The origin of these vectors is situated within Soqatra's long history of exogenous mediations by external actors and their symbolic appropriation of the island into an imaginative geography The legacy is a symbolic curse which has made Soqatra into an ideal playground for fantasist cultural or environmental experiments Accordingly this volume undertakes first a systematic inventory of the communal effects engendered within the domains of cultural modernization dissonant linguistic attitudes alienating consumption practices divergent religious affiliations and differentiating economic aspirations Second it anatomizes the process of environmental annexation through the reconstruction of the formulation and implementation process of a biodiversity conservation and sustainable development experiment in which the island and its residents are appropriated into an anachronistic paradigm a pastoral ecotopia as a blueprint of their future

Lutz, John A. Musick, Jeanette Wyneken, 2002-12-17 The success of the first volume of *The Biology of Sea Turtles* revealed a need for broad but comprehensive reviews of major recent advances in sea turtle biology *Biology of Sea Turtles Volume II* emphasizes practical aspects of biology that relate to sea turtle management and to changes in marine and coastal ecosystems These topics i *New Arabian Studies Volume 3* B. Dresch, 2000-12-07 An accessible and fast moving account of twentieth century Yemeni history **Studies in the Medieval History of the Yemen and South Arabia** G. Rex Smith, 2024-12-11 This volume brings together a set of widely scattered articles spanning some thirty years of research on early and medieval Yemen and South Arabia. They cover the political and military history of the area from the beginning of Islam to the Ottoman conquest in 1517 with the establishment of the Zaydis and then the Ayyubids as key events. Particular attention is given to the 13th century and questions of trade and historical geography. The work of the traveller Ibn al Muja'wir, the subject of a series of studies, also provides much information on the society and beliefs of the period including magic and sexual practices **Traditional Architecture of the Arabian Gulf** R. Hawker, 2008-06-10 This book chronicles the florescence of architecture in the Arabian Gulf after the expulsion of the Portuguese in the early 1600s. It demonstrates how the power vacuum created by the collapse of Portuguese control over the trade routes in the Indian Ocean encouraged a growth in fortified architecture, especially in Oman, that radiated out to the surrounding region and was then slowly replaced by new patterns in domestic and public architecture and town planning throughout the Gulf as the trade lines were secured and the individual countries took the first steps towards the formation of today's modern nation states. The book documents the buildings and crafts of this era and analyses them within the framework of the political, economic and social information available through primary sources from the period in a way that is both intelligent and accessible. It considers the settlements as part of a larger connected network of cities, towns and villages and focuses both on how the buildings provided innovative solutions to the demanding climate and yet incorporated new decorative and functional ideas. Topics are extensively and richly illustrated with colored photographs of the buildings as they are now, black and white and color historic photographs from archival and museum collections, line drawings and computer generated reconstructions. The book is therefore attractive to a number of audiences including those who live in or travel to the Gulf as well as people with an interest in Arab and Islamic design culture and society, vernacular architecture and post
