Progress in Nephrology Georges Peters, Francoise Roch-Ramel, 2013-11-11 The present volume

contains the edited proceedings of the Vth Symposium of the Gesellschaft für Nephrologie held in Lausanne Switzerland from September 21 to September 23 1967 The manuscripts were arranged according to their contents rather than to their titles An attempt was made to divide the allotted space between different contributors according to the apparent importance or originality of the contributions Most of the papers submitted were written in either German or a rather inarticulate English and subsequently have been translated into English by the editors and their collaborators The editors are indebted to Mr R Darling student of medicine of the Faculte de Medicine de l Universite de Lausanne for reviewing the English translation Editing was limited to requirements based on form rather than on content In a few instances manuscripts which were inadequate in form were accepted because their contents appeared interesting or important A very few manuscripts were either not submitted or could not be included in the present proceedings because they did not satisfy the editorial standards Some papers are published in the present proceedings in abstract form because they have been submitted elsewhere for full publication The editors responsibility does not extend to the factual content of the manuscripts The editors wish to apologize for the long delay in publishing these proceedings a delay which may be attributed to difficulties in communication and cooperation with various authors *Journal of the National Cancer Institute* ,1964 **Nosocomial Pneumonia** William R. Winslow,2012-12-06 Half a century ago our knowledge of mycoses especially pulmonary mycoses was rather fragmentary It was limited to rare case reports as oddities Accordingly in the Handbuch der speziellen pathologischen Anatomie und Histologie the chapter on lung diseases caused by budding and spore forming fungi by J WATJEN Halle took up as little as 27 pages Only ARNDT Göttingen could report on several cases from which he made his observations on actinomycotic changes of the lungs and pleura Since then our knowledge of mycoses has deepened and expanded in an unpredictable manner This progress was mainly due to research and publications in the USA and South America In Central Europe the number of cases of mycoses has increased during the last two decades being reported especially as a second disease in patients with spontaneous or iatrogenic destruction of the bone marrow after treatment of cancer with cytostatic agents The number of known types of pathogenic fungi has increased The knowledge of their types and conditions of growth have given rise to a subspecialty Therefore a great need has arisen for a new edition of the chapter on mycoses in the Henke Lubarsch Roessle Handbook of Special Pathological Anatomy and Histology
