Ausgrabungen und Bauuntersuchungen in Klöstern, Grangien und Stadthöfen Matthias Untermann, 2003 **Rural Granaries in Northern Gaul (Sixth Century BCE - Fourth Century CE)**, 2019-03-27 In recent years storage has come to the fore as a central aspect of ancient economies However studies have hitherto focused on urban and military storage Although archaeological excavations of rural granaries are numerous their evidence has yet to be fully taken into account Such is the ambition of *Rural Granaries in Northern Gaul Sixth Century BCE Fourth Century CE* Focusing on northern Gaul this volume starts by discussing at length the possibility of quantifying storage capacities and through them agrarian production Building on this first part the second half of the book sketches the evolution of rural storage in Gaul from the Iron Age to Late Antiquity setting firmly archaeological evidence in the historical context of the Roman Empire **Regna and Gentes** Hans-Werner Goetz, Jörg Jarnut, Walter Pohl, 2003 This book is the first comprehensive and comparative study of the difficult relationship between ethnic identities and political organisation in the post Roman and early medieval kingdoms 16 authors historians archaeologists and linguists deal with ten important kingdoms of this period and with its political and legal context **The European Countryside during the Migration Period** Irene Bavuso, Angelo Castorao Barba, 2023-12-31 Research on late antique and early medieval migrations has long acknowledged the importance of interdisciplinarity The field is constantly nourished by new archaeological discoveries that allow for increasingly refined pictures of socio economic development Yet the perspectives adopted by historians and archaeologists are frequently different and so are their conclusions Diverging views exist in respect to varying geographical areas and scholarly traditions too This volume brings together history and archaeology to address the impact of the inflow and outflow of migrations on the rural landscape the creation of new settlement patterns and the role of migrations and mobility in transforming society and economy Such themes are often investigated under a regional or macro regional viewpoint resulting in too fragmented an understanding of a widespread phenomenon Spanning Eastern and Western Europe the book takes steps toward an integrated picture of territories normally investigated as separate entities and critically establishes grounds for new comparisons and models on late antique and early medieval transformations Archaeological Soil and Sediment Micromorphology Cristiano Nicosia, Georges Stoops, 2017-10-23 *Archaeological Soil and Sediment Micromorphology* goes beyond a mere review of current literature and features the most up to date contributions from numerous scientists working in the field The book represents a groundbreaking and comprehensive resource covering the plethora of applications of micromorphology in archaeology *Archaeological Soil and Sediment Micromorphology* offers researchers students and professionals a systematic tool for the interpretation of thin sections of archaeological contexts This important resource is also designed to help stimulate the use of micromorphology in archaeology outside Europe where the technique is less frequently employed Moreover the authors hope to strengthen the proper application of soil micromorphology in archaeology by illustrating its

possibilities and referring in several cases to more specialized publications for instance in the field of plant remains pottery and phytoliths Written for anyone interested in the topic this important text offers Contributions from most of the world s leading authorities on soil micromorphology A series of chapters on the major topics selected among the most recurrent in literature about archaeological soil micromorphology Systematic descriptions of all important micromorphological features Special analytical tools employed on thin sections such as SEM EDS image analysis fluorescence microscopy mass spectrometry among others Numerous cross references 400 illustrated full colour plates The resource provides the most current and essential information for archaeologists geoarchaeologists soil scientists and sedimentologists Comprehensive in scope Archaeological Soil and Sediment Micromorphology offers professionals and students a much needed tool for the interpretation of thin sections of archaeological contexts **Palaeohistoria 39,40 (1997-1998)** University of Groningen, Netherlands The Biological-Archaeological Institute,2000-01-01 This annual covers excavation reports and analytical studies on archaeology palaeobotany and archaeozoology Topics covered include the Allerod vegetation of southeastern Friesland Bronze Age metal and amber in the Netherlands the origins of plums and much more **Phonological Evidence from the Continental Runic Inscriptions** Martin Findell,2012-10-01 The linguistic analysis of runic inscriptions on the Continent tends to focus on individual texts or on groups of texts seen as parallel We can advance our understanding of the state of Continental Germanic dialects in the 5th 7th centuries by examining the evidence for the major sound changes in a larger dataset The study begins with a brief discussion of the Proto Germanic phonemic system and the major processes by which the systems of Old High German OHG and Old Saxon OS develop from it The main body of the work consists of the analysis of a corpus of 90 inscriptions including but not confined to those conventionally labeled South Germanic for evidence of these changes Rather than making the individual inscription the focus for analysis the investigation groups together all possible witnesses to a particular phonological process In many respects the data are found to be consistent with the anticipated developments of OHG and OS but we encounter some problems which the existing models of the sound changes cannot account for There is also some evidence for processes at work in the dialects of the inscriptions which are not attested in OHG or OS *Hunter-Gatherers' Tool-Kit* Juan F. Gibaja,2020-01-06 This volume provides the reader with a multifaceted overview of the study of stone tools used by humans in the past Including case studies from various geographic regions and different continents and covering a wide range of chronologies the contributions here are centred on the study of human communities based on a hunter gatherer lifestyle A number of essays in this volume focus on tool production and use and address major paleoanthropological questions related to past human economic and social behaviour The book also includes detailed and careful studies of human technology during Prehistory Human origin sites and the World Heritage Convention in Eurasia Sanz, Nuria (UNESCO),2015-09-07 **Limes XVIII:** Philip Freeman,Council for British Research in the Levant,2002 A conference held under the auspices of the Department of Antiquities of the Hashemite Kingdom of Jordan
