Archaeology And The Modern World Colonial Transcripts In South Africa And The Chesapeake:

Archaeology and the Modern World Martin Hall, 2000 Starting with voyages of discovery in the 16th and 17th centuries and continuing through to the present when the material world is represented on the Internet this volume reveals a critical dimension of historical archaeology *Archaeology and the Modern World* Martin Hall, 2015-12-22 Archaeology and the Modern World advances a new controversial theory of historical archaeology Using new case studies Martin Hall evaluates the major theoretical traditions in historical archaeology while contributing significantly to the debate In this study the author places an emphasis on material culture and the recent past to bring to light a picture of an unstable and violent early colonial world in which material culture played a crucial mediating role International Handbook of Historical Archaeology Teresita Majewski, David Gaimster, 2009-06-07 In studying the past archaeologists have focused on the material remains of our ancestors Prehistorians generally have only artifacts to study and rely on the diverse material record for their understanding of past societies and their behavior Those involved in studying historically documented cultures not only have extensive material remains but also contemporary texts images and a range of investigative technologies to enable them to build a broader and more reflexive picture of how past societies communities and individuals operated and behaved Increasingly historical archaeology refers not to a particular period place or a method but rather an approach that interrogates the tensions between artifacts and texts irrespective of context In short historical archaeology provides direct evidence for how humans have shaped the world we live in today Historical archaeology is a branch of global archaeology that has grown in the last 40 years from its North American base into an increasingly global community of archaeologists each studying their area of the world in a historical context Where historical archaeology started as part of the study of the post Columbian societies of the United States and Canada it has now expanded to interface with the post medieval archaeologies of Europe and the diverse post imperial experiences of Africa Latin America and Australasia The 36 essays in the International Handbook of Historical Archaeology have been specially commissioned from the leading researchers in their fields creating a wide ranging digest of the increasingly global field of historical archaeology The volume is divided into two sections the first reviewing the key themes issues and approaches of historical archaeology today and the second containing a series of case studies charting the development and current state of historical archaeological practice around the world This key reference work captures the energy and diversity of this global discipline today *The Archaeology of Capitalism in Colonial Contexts* Sarah K. Croucher, Lindsay Weiss, 2011-08-10 The Archaeology of Capitalism in Colonial Contexts Postcolonial Historical Archaeologies explores the complex interplay of colonial and capital formations throughout the modern world The authors present a critical approach to this topic trying to shift discourses in the theoretical framework of historical archaeology of capitalism and colonialism through the use of postcolonial theory This work does not suggest a new theoretical framework as such but rather suggests the importance of revising key theoretical terms employed within

historical archaeology arguing for new engagements with postcolonial theory of relevance to all historical archaeologists as the field de centers from its traditional locations Examining case studies from North America South America the Caribbean Africa Australia the Middle East and Europe the chapters offer an unusually broad ranging geography of historical archaeology with each focused on the interplay between the particularisms of colonial structures and the development of capitalism and wider theoretical discussions Every author also draws attention to the ramifications of their case studies in the contemporary world With its cohesive theoretical framework this volume is a key resource for those interested in decolonizing historical archaeology in theory and praxis and for those interested in the development of modern global dynamics

The Routledge Handbook of Archaeology and Globalization Tamar Hodos,2016-11-18 This unique collection applies globalization concepts to the discipline of archaeology using a wide range of global case studies from a group of international specialists The volume spans from as early as 10 000 cal BP to the modern era analysing the relationship between material culture complex connectivities between communities and groups and cultural change Each contributor considers globalization ideas explicitly to explore the socio cultural connectivities of the past In considering social practices shared between different historic groups and also the expression of their respective identities the papers in this volume illustrate the potential of globalization thinking to bridge the local and global in material culture analysis The Routledge Handbook of Archaeology and Globalization is the first such volume to take a world archaeology approach on a multi period basis in order to bring together the scope of evidence for the significance of material culture in the processes of globalization This work thus also provides a means to understand how material culture can be used to assess the impact of global engagement in our contemporary world As such it will appeal to archaeologists and historians as well as social science researchers interested in the origins of globalization

Parno, 2013-02-06 This collection of essays in Archaeologies of Mobility and Movement draws inspiration from current archaeological interest in the movement of individuals things and ideas in the recent past Movement is fundamentally concerned with the relationships among time object person and space The volume argues that understanding movement in the past requires a shift away from traditional fieldwork based archaeological ontologies towards fluid trajectory based studies Archaeology by its very nature locates objects frozen in space literally in their three dimensional matrices at sites that are often stripped of people An archaeology of movement must break away from this stasis and cut new pathways that trace the boundary crossing contextuality inherent in object person mobility Essays in this volume build on these new approaches confronting issues of movement from a variety of perspectives They are divided into four sections based on how the act of moving is framed The groups into which these chapters are placed are not meant to be unyielding or definitive The first section Objects in Motion includes case studies that follow the paths of material culture and its interactions with groups of people The second section of this volume People in Motion features chapters that explore the shifting material traces of human mobility Chapters in the third section of this book Movement through Spaces illustrate the effects that particular spaces have on the people and objects who pass through them Finally there is an afterward that cohesively addresses the issue of studying movement in the recent past At the heart of Archaeologies of Mobility and Movement is a concern with the hybridity of people and things affordances of objects and spaces contemporary heritage issues and the effects of movement on archaeological subjects in the recent and contemporary past **The Archaeology of Colonialism** Barbara L. Voss, Eleanor Conlin Casella, 2011-10-31 This volume examines human sexuality as an intrinsic element in the interpretation of complex colonial societies While archaeological studies of the historic past have explored the dynamics of European colonialism such work has largely ignored broader issues of sexuality embodiment commemoration reproduction and sensuality Recently however scholars have begun to recognize these issues as essential

components of colonization and imperialism This book explores a variety of case studies revealing the multifaceted intersections of colonialism and sexuality Incorporating work that ranges from Phoenician diasporic communities of the eighth century to Britain s nineteenth century Australian penal colonies to the contemporary Maroon community of Brazil this volume changes the way we understand the relationship between sexuality and colonial history
