the issues of animal speech and animal subjectivity were managed at a time when the possession of language and consciousness had become a vital sign of the difference between humans and animals Topics of great contemporary concern such as the relation of the human and the natural masculine and feminine child and adult are investigated within their nineteenth century contexts making this an important book for nineteenth century scholars children s literature specialists and historians of science and childhood

[Animal Narratology](#) Joela Jacobs,2020-12-15 Animal Narratology interrogates what it means to narrate to speak speak for on behalf of and to voice or represent life beyond the human which is in itself as different as insects bears and dogs are from each other and yet more as individual as a single mouse horse or puma The varied contributions to this interdisciplinary Special Issue highlight assumptions about the human perception of attitude toward and responsibility for the animals that are read and written about thus demonstrating that just as the animal does not exist neither does the human In their zoopoetic focus the analyses are aware that animal narratology ultimately always contains an approximation of an animal perspective in human terms and terminology yet they make clear that what matters is how the animal is approximated and that there is an effort to approach and encounter the non human in the first place Many of the analyses come to the conclusion that literary animals give readers the opportunity to expand their own points of view both on themselves and others by adopting another s perspective to the degree that such an endeavor is possible Ultimately the contributions call for a recognition of the many spaces moments and modes in which human lives are entangled with those of animals one of which is located within the creative

bounds of storytelling      **Talking to Learn** Patricia Phelan, National Council of Teachers of English. Committee on Classroom Practices, 1989      **Animals and Their Children in Victorian Culture** Brenda Ayres, Sarah Elizabeth Maier, 2019-11-20 Whether a secularized morality biblical worldview or unstated set of mores the Victorian period can and always will be distinguished from those before and after for its pervasive sense of the proper way of thinking speaking doing and acting Animals in literature taught Victorian children how to behave If you are a postmodern posthumanist you might argue But the animals in literature did not write their own accounts Animal characters may be the creations of writers imagination but animals did and do exist in their own right as did and do humans The original essays in **Animals and Their Children in Victorian** explore the representation of animals in children s literature by resisting an anthropomorphized perception of them Instead of focusing on the domestication of animals this book analyzes how animals in literature civilize children teaching them how to get along with fellow creatures both human and nonhuman      **Equine Landscapes of Interspecies Care** Nora Schuurman, Alex Franklin, 2024-11-07 This book focuses on the spaces and practices of caring for horses explored in a series of case studies set across the equine lifespan For horses everyday practices of care as well as ever changing understandings of what is good care directly shape their living conditions and lives with humans In this book questions of animal ethics and welfare are approached in a tangible way by exploring the relationships and practices of interspecies care across a range of different spaces including horse yards training grounds farms rescue centres and the street The chapters illuminate the ways in which interspecies care ties horses to human society and culture addressing care practices in different stages of the equine life cycle Through a unique set of case studies addressing issues such as training working rescue aging and death the book offers a clear overview of how humans shape the lifespan of animals living under their care It simultaneously foregrounds the agency of animals in this process and how such agency is interpreted and responded to by humans With its theoretically solid analysis of rigorous empirical study the book answers the need to understand human connection to the nonhuman world within the everyday practices and spaces of contemporary society and culture      *When Animals Speak* Penelope Smith, 2009-08-04 Have you ever thought of Earth s creatures as healers or guides What will they teach you if you open up your mind to them In this newly revised edition of her pioneering book Penelope Smith shares powerful insight into advanced interspecies communication techniques showing yet again why *When Animals Speak* has been a valued resource for almost two decades Smith presents accessible methods that illuminate the astonishing ways humans can communicate with all Earth s creatures This advanced guide will unlock your intuitive consciousness enlightening your spiritual understanding of the world and your connection to it In addition to chapters devoted to developing and enhancing mind to mind communication with animals whether it be cherished household pets or slugs in your garden *When Animals Speak* provides a fascinating look at animals as healers and teachers Explore dealing with loss reincarnation and moments of transition learn how animals think and perceive differently than humans and even

communicate with spirits of nature Most importantly Smith shows us that communication stems from compassion a true willingness to share and listen to our animal friends *101 Science Activities for Emerging Einsteins (eBook)* Tracey Ann Schofield,2001-03-01 How does it work Why does it do that What will happen if Questions curious kids ask about everyday things from breathing to popcorn Tracey Schofield s answer to these questions is a book filled with simple fun science experiments and activities to help kids discover for themselves how the world works [The Ethics of Animal](#)

[Experimentation](#) Donna Yarri,2005-08-18 The ethical treatment of animals has become an issue of serious moral concern Many people are challenging long held assumptions about animals and raising questions about their status and treatment What is the relationship between humans and animals Do animals have moral standing Do we have direct or indirect duties to animals Does human benefit always outweigh animal suffering The use of animals for experimentation raises all of these questions in a particularly insistent way Donna Yarri gives an overview of the current state of the discussion and presents an argument for significantly restricted animal experimentation Pointing to the similarities between humans and animals she argues that the actual differences are differences of degree rather than kind Animal cognition and animal sentience together are the basis for the claim that experimental animals do have rights Examining arguments in the disciplines of ethology philosophy science and theology Yarri makes a case for placing substantial restrictions on animal experimentation Grounding her examination in Christian theology she formulates a more humane approach to animal experimentation She concludes with a concrete burden benefit analysis that can serve as the foundation for informed decision making *The Ethics of Animal Experimentation* serves as both a handbook of animal rights theory and a practical guide to navigating the complexities of animal experimentation As animal experimentation features in an increasing number of scientific endeavors it is an ethical issue that requires our immediate attention Yarri s unique contribution forges a path toward an ethical practice of animal experimentation *Human-Horse Relations and the Ethics of Knowing* Rosalie Jones McVey,2023-03-31 This book explores how equestrians are highly invested in the idea of profound connection between horse and human and focuses on the ethical problem of knowing horses In describing how true connection with horses matters Rosalie Jones McVey investigates what sort of thing comes to count as a good relationship and how riders work to get there Drawing on fieldwork in the British horse world she illuminates the ways in which equestrian culture instills the idea that horse people should know their horses better Using horsemanship as one exemplary instance where truth holds ethical traction the book demonstrates the importance of epistemology in late modern ethical life It also raises the question of whether and how the concept of truth should matter to multispecies ethnographers in their ethnographic representations of animals **101 Ethical Dilemmas**

Globalization and Animal Law Thomas G. Kelch,2017-05-01 The rise of the globalized economy has rendered an even more profound change in the relationship between humans and other animals than the ancient progression from huntergatherer to agricultural society In today's global markets multinational corporations exploit the economic value of animals throughout the world on an unprecedented scale The philosophical and legal notions that animals are mere unfeeling machines or pieces of property although more or less taken for granted for centuries has been challenged if not burst asunder in recent decades in law moral philosophy and cognitive and other sciences and regulation of the treatment of animals in agriculture experimentation entertainment and other areas has begun to make substantial inroads in national and international law This book provides a detailed analysis of international and comparative animal law focusing on the impact of today's globalized economy on animal law Describing a wide range of domestic and international laws relating to the treatment of animals the author explicates the sorts of legal rules which affect the global

animal marketplace Representative norms in existing animal protection laws are analyzed and critiqued illustrating the diverse approaches taken by different countries and by the international community in regulating uses of animals Among the issues covered are the following contemporary philosophical thought on the relationship between humans and animals recent scientific research relating to cognitive and other abilities of animals legal issues relating to factory farming and animal slaughter legal protection of animals during transport regulatory schemes on animal experimentation laws on the use of animals in entertainment laws on protection of companion animals regulation of trade in endangered species international trade issues relating to animals including consideration of the provisions of GATT and the seminal WTO GATT decisions in the Tuna Dolphin Shrimp Turtle Tuna Labeling and EU Seal Products cases constitutional protection for the interests of animals intellectual property law issues relating to animals efforts to have the legal personhood of certain animals judicially recognized and what the future may hold for animal law in the global economy To ensure the consideration of a full range of legal approaches the laws analyzed come from a wide variety of countries and jurisdictions including Australia Austria Brazil Canada the EU Germany India Ireland New Zealand Switzerland the UK and state and federal laws of the US Numerous international treaties and conventions relevant to animal treatment and animal law are also covered including the Berne Convention for the Protection of Literary and Artistic Works the CITES Convention the European Convention for the Protection of Animals Kept for Farming Purposes the European Patent Convention the GATT Treaty the TRIPS Agreement and the Universal Copyright Convention It is not difficult to grasp given the continuing increases in production consumption and use of animals and animal products worldwide that legal initiatives in this often emotional and acrimonious area of law are frequently contentious and hard fought But this is really just the dawn of animal law which has only recently become recognized as an important cutting edge topic and this area of the law promises to develop rapidly in the future This book is enormously valuable in contributing to the continuing development and understanding of this law clearly laying out the contours and boundaries of existing animal laws in our global economy and allowing legal educators concerned lawyers and policymakers to teach formulate proposals argue cases and defenses and secure a firm purchase on future trends and developments in animal law
