Appalachian Spring Marcia Bonta,2010-06-15 Marcia Bonta is a naturalist writer who has lived on a 500 acre mountain top farm in central Pennsylvania for twenty years Appalachian Spring is her personal account of that glorious spectacle the coming of the spring to the woods and fields of Appalachia The book begins with spring preliminaries in January and February when gray squirrels mate and the great horned owls conduct their courtship rites Then with the onset of true spring the intricacies of the season unravel day by day in journal entries that combine Bonta s own meticulous observations with the research reported by botanists entomologists and other natural scientists She recounts her hours spent watching an active red fox den or observing the drumming of a male ruffed grouse all without the benefit of a blind She discovers new born fawns on the trail and hen turkeys with their poults in the field A black bear peers into her sitting room window deer play tag in her front yard Birdwatching is an integral part of her spring ritual she records both the return of nesting species and the passing through of migrants She spends a blustery St Patrick s Day following a flock of American pipits foraging in her field discovers and watches an ovenbird nest beside her trail and counts twenty three species of wood warblers during one spectacular day in mid May Every aspect of the natural world catches her eye from tthe life cycle of a tent caterpillar to the sex life of a jack in the pulpit But while she considers her book to ber her own love sone about the place and season on earth she loves most she also mourns the continual exploitation of the natural earth by humanity for its own often superficial uses She hopes by recounting the wonders of the natural world to convert others to what she calls the third stage in humanity s relationship with nature that of empathy with all of nature for its own sake To know the earth better to grasp a little of its workings to look on it with awe and wonder as well as with respect is to want to save it from destruction

rain wind chill deep snow dangerous ice but also the psychological burdens of waiting for spring and the enduring often false starts that accompany its eventual return On the surface perhaps winter might seem an odd season for a nature book but there is plenty of beauty and life in the woods if only we know where to look The stark white landscape sparkles in the sunshine and glows beneath the moon on crisp clear nights the opening up of the forest makes it easy to see long distances birds some of which can be easily seen only in winter flock to feeders and animals even those that should be hibernating make surprise visits from time to time Appalachian Winter offers acclaimed naturalist Marcia Bonta s view of one season as experienced on and around her 650 acre home on the westernmost ridge of the hill and valley landscape that dominates central Pennsylvania Written in the style of a journal each day s entry focuses on her walks and rambles through the woods and fields that she has known and loved for over thirty years Along the way she discovers a long eared owl in a dense stand of conifers tracks a bear through an early December snowfall explains the life and ecological niche of the red backed vole and examines the recent arrival of an Asian ladybug These are but a few of the tidbits sprinkled throughout the book interwoven with the human stories of Bonta s family as well as the highway builders and shopping mall developers that threaten the idyllic peacefulness of her mountain This is the fourth and final volume of Bonta s seasonal meditations on the natural history of the northern Appalachian Mountains Her gentle charming accounts of changing weather and of the struggles faced by plants animals and insects breathe new warmth into the coldest months of the year
