Animal Welfare and Human Values Rod Preece,Lorna Chamberlain,2010-10-30 As the most populous province in Canada Ontario is a microcosm of the animal welfare issues which beset Western civilization The authors of this book chairman and vice chairman respectively of the Ontario Society for the Prevention of Cruelty to Animals find themselves constantly being made aware of the atrocities committed in the Society s jurisdiction They have been in turn puzzled exasperated and horrified at humanity s cruelty to our fellow sentient beings The issues discussed in this book are the most contentious in animal welfare disputes animal experimentation fur farming and trapping the use of animals for human entertainment and the conditions under which animals are raised for human consumption They are complex issues and should be thought about fairly and seriously The authors standing squarely on the side of the animals suggest community and belonging as concepts through which to understand our relationships to other species They ground their ideas in Wordsworth s primal sympathy and Jung s unconscious identity with the animal realm The philosophy developed in this book embraces common sense and compromise as the surest paths to the goal of animal welfare It requires respect and consideration for other species while acknowledging our primary obligations to our fellow humans [Animal Rights](#) Kevin Hile,2009 From questions over whether it is appropriate to eat meat or to wear fur or leather this title examines all sides of this very controversial issue **The Rights of Animals; on the Responsibility and Obligation of Man, in the Treatment He is Bound to Observe Towards the Animal Creation** Sarah Burdett,1839 **Everything is Design: The Hidden Ethics of Our Objects and Public Spaces** Alan J. standards that guides how we treat ourselves one another and the environment When we design things for public use we also communicate an ethical perspective When we use things designed for us we adopt their ethics This book synthesizes several different disciplines as they relate to design ethics and the built environment Our objects according to philosophers like Ihde Verbeek and Latour mediate our experiences with the world around us Through their designs and by extension our perceived affordances we largely comply with what our objects and spaces want us to do At the micro level the phones in our pockets command our attentive processes in order to feed an attention economy At the macro level urban planning and infrastructure can both promote inclusivity and foment violence We are deeply intertwined with the objects and spaces that have been designed for us Baked into every object process system and environment are the remnants of the designer s morals ethics values and biases Importantly this book seeks to cultivate mindfulness of the reader s interactions with their surrounding world providing them with a line of inquiry that questions areas of unethical design in their built environment and offers useful critiques and new solutions to these ethical dilemmas We often have the power to reject those things that are irresponsibly designed and unethical in nature and it is through this agency as users that we can demand better from designers developers and companies It is imperative to understand our mediated relationships with the built environment that surrounds us and the objects within it this can help explain our behaviors and empower us to make ethical decisions that serve future generations
