Colley, 2016-02-11 What did the 13th Earl of Derby his twenty two year old niece Manchester's Belle Vue Zoo and even some ordinary laborers all have in common All were avid collectors and exhibitors of exotic and frequently unruly specimens In her study of Britain's craze for natural history collecting Ann C Colley makes extensive use of archival materials to examine the challenges preoccupations and disordered circumstances that attended the amassing of specimens from faraway

places only vaguely known to the British public As scientific institutions sent collectors to bring back exotic animals and birds for study and classification by anatomists and zoologist it soon became apparent that collecting skins rather than live animals or birds was a relatively more manageable endeavor Colley looks at the collecting exhibiting and portraying of animal skins to show their importance as trophies of empire and representations of identity While a zoo might display skins to promote and glorify Britain s colonial achievements Colley suggests that the reality of collecting was characterized more by chaos than imperial order For example Edward Lear s commissioned illustrations of the Earl of Derby s extensive collection challenge the colonial s or collector s commanding gaze while the Victorian public demonstrated a yearning to connect with their own wildness by touching the skins of animals Colley concludes with a discussion of the metaphorical uses of wild skins by Gerard Manley Hopkins and other writers exploring the idea of skin as a locus of memory and touch where one s past can be traced in the same way that nineteenth century mapmakers charted a landscape Throughout the book Colley calls upon recent theories about the nature and function of skin and touch to structure her discussion of the Victorian fascination with wild animal skins
