Animals Metaphysically Speaking Nancy Kindl, 2010-01-04 Within these covers is a beautiful spiritual interpretation of the symbolic reasoning for the creation of the animal kingdom The symbolic messages allow each of us to embrace our blind faith in a loving creator and most importantly our eternal connection to that creator **Animals** Peter Adamson, G. Fay Edwards, 2018 Philosophical controversy over non human animals extends further back than many realize before Utilitarianism and Darwinism to the very genesis of philosophy This volume examines the richness and complexity of that long history Twelve essays trace the significance of animals from Greek and Indian antiquity through the Islamic and Latin medieval traditions to Renaissance and early modern thought ending with contemporary notions about animals Two main questions emerge throughout the volume what capacities can be ascribed to animals and how should we treat them Notoriously ungenerous attitudes towards animals mental lives and ethics status found for instance in Aristotle and Descartes are shown to have been more nuanced than often supposed while remarkable defenses of benevolence towards animals are unearthed in late antiquity India the Islamic world and Kant Other chapters examine cannibalism and vegetarianism in Renaissance thought and the scientific testing of animals A series of interdisciplinary reflections sheds further light on human attitudes towards animals looking at their depiction in visual artworks from China Africa and Europe as well as the rich tradition of animal fables beginning with Aesop *Metaphysical Themes, Medieval and Modern (Volume 11)* Alexander W. Hall, Gyula Klima, 2014-03-25 *Metaphysical Themes Medieval and Modern* presents three sets of essays that engage the metaphysics of substance through a study of thought on this theme over the last eight centuries shedding light on contemporary disputes as well as the history of thought leading into the modern era Part I grows out of an author meets critics panel on Robert Pasnau's *Metaphysical Themes* 1274 1671 OUP 2011 Pasnau's rich study delves into the four centuries wherein later medieval thought gives way to the modern period Andrew Arlig reflects on Pasnau's discussion of holonmers entities such as God and the human soul that are thought to exist as wholes in more or less disparate things Paul Symington on the other hand treats the substance ontology of Thomas Aquinas in particular through a reflection on Aquinas's understanding of the ontological status of the various modes or accidents of Aristotelian substances Part II Substance Ontology Medieval and Modern transitions to contemporary substance ontology Travis Dumsday canvasses the field of debate over what is the substratum of change contending that the Aristotelian hylomorphic account of substance that views substances as matter form composites remains the most robust Gyula Klima while agreeing with Dumsday's conclusion strengthens his argument with reference to the development of this bundle of problems within the recent history of analytic philosophy Dumsday concludes with reflections on the relevance of substance ontology to natural theology which in turn is the theme of Part III The Natural Theology of Thomas Aquinas wherein Alexander Hall and Michael Sirilla consider how Aquinas's understanding of the divine substance bears on the logic of demonstration in his natural theology concluding that

The Political Animal in Medieval Philosophy Juhana Toivanen, 2020-10-12 In *The Political Animal in Medieval Philosophy* Juhana Toivanen investigates what medieval philosophers meant when they argued that human beings are political animals by nature. He analyses the notion of political animal from various perspectives and shows its relevance to philosophical discussions concerning the foundations of human sociability, ethics and politics. Medieval authors believed that social life stems from the biological and rational nature of human beings and that collaboration with other people promotes prosperity and good life. Toivanen provides a detailed philosophical interpretation of this view across a wide range of authors, including unedited manuscript sources. As the first monograph-length study on the topic, *The Political Animal* sheds new light on this significant period in western political thought.

Mindreading Animals Robert W. Lurz, 2011-07-29 A comprehensive examination of a hotly debated question proposes a new model for mindreading in animals and a new experimental approach. Animals live in a world of other minds, human and nonhuman, and their well-being and survival often depends on what is going on in the minds of these other creatures. But do animals know that other creatures have minds? And how would we know if they do? In *Mindreading Animals*, Robert Lurz offers a fresh approach to the hotly debated question of mental state attribution in nonhuman animals. Some empirical researchers and philosophers claim that some animals are capable of anticipating other creatures' behaviors by interpreting observable cues as signs of underlying mental states; others claim that animals are merely clever behavior readers capable of using such cues to anticipate others' behaviors without interpreting them as evidence of underlying mental states. Lurz argues that neither position is compelling and proposes a way to move the debate and the field forward. Lurz offers a bottom-up model of mental state attribution that is built on cognitive abilities that animals are known to possess rather than on a preconceived view of the mind applicable to mindreading abilities in humans. Lurz goes on to describe an innovative series of new experimental protocols for animal mindreading research that show in detail how various types of animals, from apes to monkeys to ravens to dogs, can be tested for perceptual state and belief attribution.

Metaphysical Animals Clare Mac Cumhaill, Rachael Wiseman, 2022-02-03 WINNER OF THE HWA NON FICTION CROWN AN IRISH TIMES BOOK OF THE YEAR A NEW YORK TIMES BOOK REVIEW NOTABLE BOOK A FINALIST FOR THE NATIONAL BOOK CRITICS CIRCLE AWARD Elizabeth Anscombe, defiantly brilliant, chain-smoking trouser-wearing Catholic and eventual mother of seven; Philippa Foot, pathologically discreet, quietly rebellious granddaughter of a US president; Mary Midgley, witty scholar and careful observer of humans and animals alike; Iris Murdoch, aspiring novelist and Francophile with the power to seduce almost anyone. Written with expertise and flair, *Metaphysical Animals* is a vivid portrait of the endeavours and achievements of these four remarkable women. As undergraduates at Oxford during the Second World War, they shared ideas as well as shoes, sofas and lovers. From the disorder and despair of war, they went on to breathe new life into philosophy, creating a radically fresh way of thinking about freedom, reality and human

nature of life the problem of generation and the concepts of health and illness Des Chene begins by surveying works that Descartes would likely have encountered from late Aristotelian theories of the soul to medical literature and treatises on machines The Cartesian theory of vital operations is examined with particular attention to the generation of animals Des Chene also considers the role of the machine model in furnishing a method in physiology the ambiguities of the notion of machine and of Descartes s problem of simulation Finally he looks at the various kinds of unity of the body both in itself and in its union with the soul Spirits and Clocks continues Des Chene s highly regarded exploration begun in his previous book Life s Form of the scholastic and Cartesian sciences as well as the dialogue between these two worldviews **On**

Metaphysical Necessity Franklin I. Gamwell,2020-08-01 In this collection of essays Franklin I Gamwell offers a defense of transcendental metaphysics especially in its neoclassical form and builds a case for its importance as a tool for addressing abiding problems in philosophical theology and morality including talk about God human fault moral decision and the relationship of politics and religious freedom In Part I Gamwell argues against Kant and a wide range of contemporary philosophers for the validity of transcendental metaphysics designated in the strict sense He engages with Aquinas Schleiermacher Augustine and Reinhold Niebuhr to argue that neoclassical metaphysics for which the divine whole is itself temporal or forever self surpassing provides a more coherent account of God than does classical metaphysics for which the divine whole is completely eternal In Part II Gamwell looks at transcendental metaphysics designated in the broad sense In particular he takes up the moral opportunity with which humans are presented and argues that the moral law depends on a comprehensive good that is a good defined metaphysically in the strict sense He then offers an extended discussion of the relation between transcendental metaphysics and morality and explores Ronald Dworkin s view of the relationship between democracy and religion the question of whether religious activities are properly exempted from generally applicable laws and the constitutional debate about national and states rights **The Metaphysics of Liberty** Frank Forman,2012-12-06

Philosophy suffers from an excess of convoluted introspection One result is that concepts multiply unchecked That some events have observable causes gets reified into a First Cause or in a more secular age to the thesis that every event is fatalistically determined Another drawback of convoluted introspection is that tiny but crucial assumptions slip in often unawares with the result that densely argued counter tomes are written in reply and no progress is made toward any kind of consensus At bottom subjectivity reigns I exaggerate Toward the other pole of the subjectivity objectivity continuum consensus among scientists is in fact always at a good healthy distance from compulsive unanimity New theories replace old and at any one time the evidence can usually be interpreted two ways Indeed it is possible to pile epicycle upon epicycle in the Ptolemaic system of the heavens and approximate the ellipses planets travel in the Copernican system What cinched the case for Copernicus was not simplicity after all alchemy is simpler than chemistry Nor was it experiment there were no moon shots back then Rather it was Newton s foundations He established a physics for the earth and the heavens alike Earthly

physics we can verify and it does not jell with the Ptolemaic system *The Animal's Defender and Zoophilist* ,1899 **The Cartesian Mind** Jorge Secada, Travis Tanner, Cecilia Wee, 2025-09-03 Descartes is widely acknowledged as a central figure in the origins of modernity The nature of his thought and of the role it played is however a matter of considerable dispute among experts The Cartesian Mind is a significant contribution to this debate It covers the full extent of his work not only placing it in its historical context but also exploring its reception legacy and contemporary significance Comprising over 40 chapters by an international team of distinguished scholars the collection is divided into 3 parts Historical Context Philosophical Themes Reception and Influence Within these parts key topics are addressed including Descartes s life and works Platonism Scholasticism Stoicism skepticism atomism meditation method the self God will and freedom mind and body biology and medicine causation mathematics the natural sciences philosophy of science ethics and the origins of idealism Descartes s reception and legacy within science and philosophy from the seventeenth century to our days including current analytic and continental traditions as well as within the broader contemporary culture also receive sustained attention Descartes s work is central to all areas of philosophy including epistemology metaphysics philosophy of mind philosophy of science and ethics As such The Cartesian Mind is essential reading and an indispensable tool for all students and researchers in the discipline **Animalism** Stephan Blatti, Paul F. Snowdon, 2016 What are we What is the nature of the human person Animalism has a straightforward answer to these long standing philosophical questions we are animals Fifteen philosophers offer new essays exploring this increasingly popular view some defending animalism others criticizing it and others exploring its more philosophical implications **Kant's Groundwork for the Metaphysics of Morals** Henry E. Allison, 2011-10-06 Henry E Allison presents a comprehensive commentary on Kant s Groundwork for the Metaphysics of Morals 1785 Allison pays special attention to the structure of the work and its historical and intellectual context He argues that despite its relative brevity the Groundwork is the single most important work in modern moral philosophy **René Descartes's Natural Philosophy and Particular Bodies** Fabrizio Baldassarri, 2024-01-01 This book explores Ren Descartes s attempts to describe particular bodies such as rocks minerals metals plants and animals within the mechanistic interpretation of nature of his philosophical program Despite his early rationalistic epistemology Descartes s increasing attention to collections histories lists of qualities and particular bodies results in a puzzling short history of all natural phenomena contained in the Principles of philosophy 1644 The present book outlines the role of Descartes s observations and experimentation as he aimed to construct a universal science of nature ultimately revealing the mechanization of nature in detail and for curious bodies such as the Bologna Stone or the sensitive herb What results is a theoretical natural history consistent with the mechanical principles of his philosophy ultimately shedding new light on his attempt to produce a complete philosophy of nature **The Human Animal** Eric T. Olson, 1999-09-02 Most philosophers writing about personal identity in recent years claim that what it takes for us to persist through time is a matter of psychology In this

groundbreaking new book Eric Olson argues that such approaches face daunting problems and he defends in their place a radically non psychological account of personal identity He defines human beings as biological organisms and claims that no psychological relation is either sufficient or necessary for an organism to persist Rejecting several famous thought experiments dealing with personal identity he instead argues that one could survive the destruction of all of one's psychological contents and capabilities as long as the human organism remains alive
