Animals As Social Beings:

Animals as Social Beings Adolf Portmann, 1961 Analysis based on the premise that to a large extent all higher forms of animal life are social

Social Creatures Clifton P. Flynn, 2008 Other than human animals are an overwhelming presence in our collective and individual lives and at the same time are taken for granted by human animals Sociologists have neglected the study of human animal interaction and the role of animals in society This is true despite the fact that animals are an integral part of our lives in our language food families economy education science and recreation In more than thirty essays Social Creatures examines the role of animals in human society Collected from a wide range of periodicals and books these important works of scholarship examine such issues as how animal shelter workers view the pets in their care why some people hoard animals animals and women who experience domestic abuse philosophical and feminist analyses of our moral obligations toward animals and many other topics Social Creatures includes work by Peter Singer Tom Regan Carol J Adams Josephine Donovan Barbara Noske Arnold Arluke Ken Shapiro and many leading scholars anthropologists and psychologists The book also comes with an extensive bibliography of hundreds of articles and books

The Palgrave Handbook of Social Harm Pamela Davies, Paul Leighton, Tanya Wyatt, 2021-09-09 This handbook explores the concept of harm in criminological scholarship and lays the foundation for a future zemiological agenda Social harm as a theoretical construct has become established as an alternative broader lens through which to understand the causation and alleviation of widespread harm in society thus moving beyond criminology and state definitions of crime and extending the range of criminological research Applying zemiological concepts this book comprehensively explores topics including violence moral indifference workplace injury corporate and state harms animal rights migration gender poverty security and victimisation This definitive work covers theory research scholarship and future visions across four sections and includes contributions from areas such as criminology sociology socio legal and cultural studies social policy and international relations It offers readers up to date original theoretical perspectives and an analysis of a broad range of issues from a social harm perspective

Selfish Genes to Social Beings Jonathan Silvertown, 2024-03-12 For all the selfishness of genes they team up to survive Is the history of life in fact a story of cooperation Amid the violence and brutality that dominates the news it is hard to think of ourselves as team players But cooperation Jonathan Silvertown argues is a fundamental part of our make up and deeply woven into the whole four billion year history of life Starting with human society Silvertown digs deeper to show how cooperation is key to the cells forming our organs to symbiosis between organisms to genes that band together to the dawn of life itself Cooperation has enabled life to thrive and become complex Without it life would never have begun

The Poverty of Animals Mehmet Kanatli, 2022-12-09 This book makes a theoretical contribution to animal rights issues from a Marxist perspective Drawing on ethics politics and philosophy it focuses on how to create a social formation that will improve animal welfare Further the book enables the readers to grasp current theoretical debates on animal welfare and to gain insight into theoretical and

practical perspectives in dealing with the animal issues The volume will be of great interest to scholars of politics and political philosophy especially Marxism and animal rights activists *Animals and Society (RLE Social Theory)* Keith Tester, 2014-08-21 *Animals and Society* uses a variety of historical sources and a coherent social theory to tell the story of the invention of animal rights It moves from incidents like the medieval execution of pigs to a discussion of the politics and strategies of modern rights organisations The book also presents radical interpretations of nineteenth century animal welfare laws and the accounts of the Noble Savage The insights generated by social science are always at the core of the discussion and the author draws on the work of Michel Foucault Norbert Elias Claude Levi Strauss and Mary Douglas This wide ranging and accessible book provides a fascinating account of the relations between humans and animals It raises far reaching questions about the philosophy history and politics of animal rights **Darwinian Natural Right** Larry Arnhart, 1998-04-02 This book shows how Darwinian biology supports an Aristotelian view of ethics as rooted in human nature Defending a conception of Darwinian natural right based on the claim that the good is the desirable the author argues that there are at least twenty natural desires that are universal to all human societies because they are based in human biology The satisfaction of these natural desires constitutes a universal standard for judging social practice as either fulfilling or frustrating human nature although prudence is required in judging what is best for particular circumstances The author studies the familial bonding of parents and children and the conjugal bonding of men and women as illustrating social behavior that conforms to Darwinian natural right He also studies slavery and psychopathy as illustrating social behavior that contradicts Darwinian natural right He argues as well that the natural moral sense does not require religious belief although such belief can sometimes reinforce the dictates of nature *Teaching the Animal: The Social Sciences* , **Routledge**

Handbook of Religion and Ecology Willis J. Jenkins, Mary Evelyn Tucker, John Grim, 2016-07-22 The moral values and interpretive systems of religions are crucially involved in how people imagine the challenges of sustainability and how societies mobilize to enhance ecosystem resilience and human well being The Routledge Handbook of Religion and Ecology provides the most comprehensive and authoritative overview of the field It encourages both appreciative and critical angles regarding religious traditions communities attitude and practices It presents contrasting ways of thinking about religion and about ecology and about ways of connecting the two terms Written by a team of leading international experts the Handbook discusses dynamics of change within religious traditions as well as their roles in responding to global challenges such as climate change water conservation food and population It explores the interpretations of indigenous traditions regarding modern environmental problems drawing on such concepts as lifeway and indigenous knowledge This volume uniquely intersects the field of religion and ecology with new directions within the humanities and the sciences This interdisciplinary volume is an essential reference for scholars and students across the social sciences and humanities and for all those looking to understand the significance of religion in environmental studies and policy **Animals, Ethics, and Engineering**

Rosalyn W. Berne, 2025-08-07 *Animals Ethics and Engineering Intersections and Implications* is a seminal work that explores the intricate relationship between technology ethics and the welfare of nonhuman animals Edited by Rosalyn W Berne this volume brings together leading scholars and practitioners to examine the ethical responsibilities inherent in technological progress and its impact on animal well being *The Animal Ethics Reader* Susan J. Armstrong, Richard G.

Botzler, 2016-11-18 *The Animal Ethics Reader* is an acclaimed anthology containing both classic and contemporary readings making it ideal for anyone coming to the subject for the first time It provides a thorough introduction to the central topics controversies and ethical dilemmas surrounding the treatment of animals covering a wide range of contemporary issues such as animal activism genetic engineering and environmental ethics The extracts are arranged thematically under the following clear headings Theories of Animal Ethics Nonhuman Animal Experiences Primates and Cetaceans Animals for Food Animal Experimentation Animals and Biotechnology Ethics and Wildlife Zoos and Aquariums Animal Companions Animal Law and Animal Activism Readings from leading experts in the field including Peter Singer Bernard E Rollin and Jane Goodall are featured as well as selections from Tom Regan Jane Goodall Donald Griffin Temple Grandin Ben A Minteer Christine Korsgaard and Mark Rowlands Classic extracts are well balanced with contemporary selections helping to present the latest developments in the field This revised and updated Third Edition includes 31 new readings on a range of subjects including animal rights captive chimpanzees industrial farm animal production genetic engineering keeping cetaceans in captivity animal cruelty and animal activism The Third Edition also is printed with a slightly larger page format and in an easier to read typeface Featuring contextualizing introductions by the editors study questions and further reading suggestions as the end of each chapter this will be essential reading for any student taking a course in the subject With a new foreword by Bernard E Rollin **Federal Register**, 1990-08 **The Human Being, the World and God** Anne L.C.

Runehov, 2016-09-26 This book offers a philosophical analysis of what it is to be a human being in all her aspects It analyses what is meant by the self and the I and how this feeling of a self or an I is connected to the brain It studies specific cases of brain disorders based on the idea that in order to understand the common one has to study the specific The book shows how the self is thought of as a three fold emergent self comprising a relationship between an objective neural segment a subjective neural segment and a subjective transcendent segment It explains that the self in the world tackles philosophical problems such as the problem of free will the problem of evil the problem of human uniqueness and empathy It demonstrates how the problem of time also has its place here For many people the world includes ultimate reality hence the book provides an analysis and evaluation of different relationships between human beings and Ultimate Reality God The book presents an answer to the philosophical problem of how one could understand divine action in the world **Animals as Legal Beings** Maneesha Deckha, 2020 In *Animals as Legal Beings* Maneesha Deckha critically examines how Canadian law and by extension other legal orders around the world participate in the social construction of the human animal divide and the

abject rendering of animals as property Through a rigorous but cogent analysis Deckha calls for replacing the exploitative property classification for animals with a new transformative legal status or subjectivity called beingness In developing a new legal subjectivity for animals one oriented toward respecting animals for who they are rather than their proximity to idealized versions of humanness *Animals as Legal Beings* seeks to bring critical animal theorizations and animal law closer together Throughout Deckha draws upon the feminist animal care tradition as well as feminist theories of embodiment and relationality postcolonial theory and critical animal studies Her argument is critical of the liberal legal view of animals and directed at a legal subjectivity for animals attentive to their embodied vulnerability and desirous of an animal friendly cultural shift in the core foundations of anthropocentric legal systems Theoretically informed yet accessibly presented *Animals as Legal Beings* makes a significant contribution to an array of interdisciplinary debates and is an innovative and astute argument for a meaningful more than human turn in law and policy *Animal Labour* Charlotte E. Blattner, Kendra Coulter, Will Kymlicka, 2020 Animals do a wide range of work in our society but they are rarely recognized as workers or accorded any labour rights and their working conditions are often oppressive and exploitative Drawing on law ethics and labour studies the essays in this volume explore the potential and dangers of animal labour **Mental Health and Well-Being in Animals** Franklin D. McMillan, 2008-06-02 The past few decades have seen a virtual explosion of scientific research in the area of cognition emotions suffering and mental states in animals Studies in the field laboratory and clinical medical practice have amassed an overwhelming body of evidence demonstrating that mental well being is of paramount importance in all aspects of animal care There is no longer any reasonable doubt among researchers that mental health is of equal importance as physical health and animal well being Recent research convincingly shows that physical health is strongly influenced by mental states thereby making it clear that effective health care requires attention to the emotional well being as well as physical Yet for its vast importance mental health in veterinary medicine has to date not been compiled and structured into an organized field or body of knowledge This information so critical to the formal establishment of the field of mental health and well being in animals remains scattered throughout a wide array of scientific journals This book represents the first authoritative reference text bringing together the most up to date information in the variety of subjects comprising the field of mental health and well being in animals Bringing together a host of distinguished experts internationally noted in the fields of animal emotion research animal behavior cognitive science and neuroscience the book represents the first authoritative reference compiling the diverse information on the animal mind and combining the revolutionary advances in the cognitive sciences with the knowledge in veterinary medicine and clinical animal behavior This book takes a descriptive and proscriptive approach to mental health mixing the scientific research with practical information with clinical applications for veterinary health professionals to use in practice *On Earth as It Is in Heaven* David Vincent Meconi S.J., 2016 With the recent publication of Pope Francis s encyclical *Laudato Si* many people of faith have found

themselves challenged to seek new ways of responding to serious ecological questions essential to the flourishing of all creatures On Earth as It Is in Heaven brings together fifteen top scholars to consider pressing contemporary environmental concerns through the lens of Catholic theology Drawing from ancient Christian sources the contributors delve into such diverse topics as equitable food distribution responsible procreation land stewardship evolutionary theodicy and poverty and providence A concluding essay addresses the liturgy as the space in which all creation is consecrated before the cross of Christ Allowing the earliest Church Fathers and voices from the Christian tradition to speak to our unique circumstances today this engaging volume shows that ancient creedal Christianity contains important insights into caring for God's creation

The Animal Rights/Environmental Ethics Debate Eugene C. Hargrove, 1992-01-01 Reprints 11 articles and chapters of books that document the environmental ethics view of the animal rights movement exploring whether animal welfare considerations can provide a basis for an environmental ethic Offered as a view of wildlife to complement and challenge at times the animal rights literature which focuses on domestic animals and subjects of experiments Paper edition unseen 14 95 Annotation copyrighted by Book News Inc Portland OR Animals in Social Work T. Ryan, 2014-10-09 This collection of essays articulates theoretical and philosophical arguments and advances practical applications as to why animals ought to matter to social work in and of themselves It serves as a persuasive corrective to the current invisibility of animals in contemporary social work practice and thought *Christianity and Positivism* James McCosh, 1874
