**Last Operas and Plays** Gertrude Stein, 1995-05-22 When I see a thing it is not a play for me but when I write something that somebody else can see then it is a play for me Gertrude Stein In the more than seventy five plays Gertrude Stein wrote between 1913 and 1946 she envisioned a new dramaturgy beginning with her pictorial conception of a play as a landscape She drew into her plays the daily flow of life around her including the natural world and turned cities villages parts of the dramatic structure and even her own friends into characters She made punctuation and typography part of her compositional style and chose words for their joyful impact as sound and wordplay For Stein the writing process itself was always important in developing the continuous present at the heart of her work Long out of print *Last Opera and Plays* again makes available many of Stein's most important and most produced works As a special feature it also included her thought provoking essay *Plays* in which she reflects on the experience in the theater of seeing and hearing and on emotion and time Now nearly a half century after her death writes Bonnie Marranca in her introduction it is indisputable that Gertrude Stein is the great American modernist mind No American author has been more influential for more generations of artists in the worlds of theater dance music poetry painting and fiction
