**Making Catfish Bait Out of Government Boys** Claire Strom,2010 This first full length study of the cattle tick eradication program in the United States offers a new perspective on the fate of the yeomanry in the twentieth century South during a period when state and federal governments were both increasing and centralizing their authority As Claire Strom

relates the power struggles that complicated efforts to wipe out the *Boophilus* tick she explains the motivations and concerns of each group involved including large and small scale cattle farmers scientists and officials at all levels of government In the remote rural South such as the piney woods of south Georgia and north Florida resistance to mandatory treatment of cattle was unusually strong and sometimes violent Cattle often ranged free and their owners raised them mostly for local use rather than faraway markets Cattle farmers in such areas shows Strom perceived a double threat in tick eradication mandates In addition to their added costs eradication schemes with their top down imposition of government expertise were anathema to the yeomanry's notions of liberty Strom contextualizes her southern focus within the national scale of the cattle industry discussing for instance the contentious place of cattle drives in American agricultural history Because Mexico was the primary source of potential tick reinfestation Strom examines the political and environmental history of the Rio Grande giving the book a transnational perspective Debates about the political and economic culture of small farmers have tended to focus on earlier periods in American history Here Strom shows that pockets of yeoman culture survived into the twentieth century and that these communities had the power to block if only temporarily the expansion of the American state

*General Technical Report NE*, 1980      *Integrated Pest Management* Rajinder Peshin, David Pimentel, 2014-06-13 The book deals with the present state and problems of integrated pest management IPM as relating to stakeholder acceptance of IPM and how IPM can become a sustainable practice The book covers the implementation of integrated pest management in USA Canada Denmark Germany Italy Sweden Netherlands China India Indonesia Australia Africa and its impact in reducing pesticide use in agriculture The book also deals with the impact of transgenic crops on pesticide use      **Interchanges of Insects between Agricultural and Surrounding Landscapes** B.S. Ekbom, Michael E. Irwin, Y. Robert, 2000-01-31 The chapters in this book were developed from some of the lectures presented at a symposium at the XX International Congress of Entomology held in Florence Italy in August 1996 The purpose of the symposium was to discuss the impact of evolving modern agricultural landscapes on the insect species of both economic and ecological importance that utilize that habitat Agricultural policy to some extent influences the choices that farmers make and thereby the shape of the agricultural landscape In order to move toward more sustainable agro ecosystems future policy makers will have to consider the history of land use consumer demands for both environmentally sound and affordable products and the conservation of biological diversity I would hope the information contained in this book will help stimulate discussion about the consequences of policy decisions on our agricultural landscapes and their insect inhabitants I thank all the speakers from the symposium and in particular those that have been able to contribute chapters to this book There have been many delays most due to circumstances beyond anyone's control I would like to express my appreciation to Gloria Verhey and Patrick Dumont for taking care of the book in these final months CHAPTER I INTERCHANGES OF INSECTS BETWEEN AGRICULTURAL AND SURROUNDING LANDSCAPES BARBARA EKBOM Department of Entomology Swedish University of Agricultural Sciences
