Annual Energy Review 2008

The *Annual Energy Review* (AER) is the Energy Information Administration's (EIA) primary report of annual historical energy statistics. For many series, data begin with the year 1949. Included are statistics on total energy production, consumption, trade, and energy prices; overviews of petroleum, natural gas, coal, electricity, nuclear energy, renewable energy, and international energy; financial and environment indicators; and data unit conversions.

Publication of this report is required under Public Law 95-91 (Department of Energy Organization Act), Section 205(c), and is in keeping with responsibilities given to the EIA under Section 205(a)(2), which states:

"The Administrator shall be responsible for carrying out a central, comprehensive, and unified energy data and information program which will collect, evaluate, assemble, analyze, and disseminate data and information."

The AER is intended for use by Members of Congress, Federal and State agencies, energy analysts, and the general public. EIA welcomes suggestions from readers regarding the content of the AER and other EIA publications.

Important Notes About the Data

Data Displayed: For tables beginning in 1949, some early years (usually 1951-1954, 1956-1959, 1961-1964, and 1966-1969) are not shown on the tables in the printed report or the Portable Document Formats (PDF) files; however, all years of data are shown in the Excel formats and the HyperText Markup Language (HTML) files.

Comprehensive Changes: Most AER 2008 tables and figures carry a new year of data (usually 2008), which are often preliminary and likely to be revised next year, and revisions to much of the 2007 data, which are now final in many
