Library Automation LaVahn Overmyer,1970 *Knowledge and Special Libraries* Suzanne Connolly,James Matarazzo,2009-11-03 First Published in 1998 Formerly a library was viewed as a place for information storage and information was viewed as simply bits of data Furthermore many wielded information as a tool of power in that those who had more information had more authority It is becoming increasingly clear that shared collective knowledge of an organization is of far greater value than that of each individual s privately held data In view of the librarian s changing profession it has also become clear that they are now being charged with the mission to explore and implement new and innovative methods to encourage sharing and to better manage information The articles selected for this compendium are well thought out and organized and are drawn from the fields of information and library science and business management Since most special libraries are corporate libraries the selections are taken from these different disciplines to provide perspectives from both a business standpoint and an information management one The selections contain many different predictions about libraries and librarians of the future They focus on new roles and highlight the importance of the profession With the rapid growth of technology end users are being inundated with choices They need expert advice from experienced practitioners Currently much of the literature focuses solely on the management of libraries as opposed to environment in which libraries operate The purpose of this reader is to correct that **The Economic Value of Information** David B. Lawrence,2012-12-06 The Scope of This Book Popular culture often refers to current times as the Information Age classifying many of the technological economic and social changes of the past four decades under the rubric of the Information Revolution But similar to the Iron Age before it the description Information Age suggests the idea that information is a commodity in the marketplace one that can be bought and sold as an item of value When people seek to

acquire information yet complain about information overload and when organizations invest millions in information systems yet are unable to pinpoint the benefits perhaps this reflects a difficulty with the assessment of the value of this commodity relative to its cost and an inability to discern the useless from the useful from the wasteful The Information Age requires us to assess the value cost and gain from information and to do it from several different viewpoints At the most elementary level is the individual who perceives a need for information her current state of knowledge is insufficient and something needs to be understood or clarified or updated or forecast There is a universe of alternative information sources from which to choose some more informative than others some more costly than others The individual's problem is to evaluate the alternatives and choose which sources to access An organization comprising many information seeking employees and agents must take a somewhat broader viewpoint
