2004 Annual Review of Development Effectiveness Christopher D. Gerrard, 2005-01-01 The 2004 Annual Review of Development Effectiveness looks at the recent growth and poverty reduction experience of client countries It assesses the extent to which Bank interventions have contributed to growth and poverty reduction and the effectiveness of different types of interventions The review uses the key elements of the Bank's 2001 poverty reduction strategy to examine the extent to which these elements respond to the needs of the poor are actually being carried out and are having an impact *Annual Review of Development Effectiveness 2006* Monika Huppi, 2006 The results agenda adopted by the World Bank and other donors aims to ensure that development assistance yields sustainable poverty reduction Effective poverty reduction results from three main factors sustained and inclusive growth effective service delivery to the poor and capable public sector institutions that are accountable to stakeholders for the results they achieve The Annual Review of Development Effectiveness 2006 assembles evaluative evidence around three questions central to poverty reduction How effectively has economic growth translated into poverty reduction in Bank assisted countries and what factors have affected these results What factors have led to high quality results in areas that deliver services to the poor What measures help raise the accountability of public institutions responsible for delivering and sustaining these results The report identifies three key areas where the World Bank can further strengthen its effectiveness in helping countries reduce poverty Economic growth has improved in many Bank client countries but a stronger focus on the nature of growth is needed to ensure that such growth leads to jobs for the poor and productivity increases in poorer regions and sectors where the poor earn their incomes Consistent use of a clearly articulated results chain helps ensure that Bank country assistance programs and individual projects set realistic objectives that key cross sectoral constraints to achieving them are adequately considered and that due attention is given to building capacity A realistic assessment of the political economy of governance related reforms is needed to tailor efforts to increase the accountability of public sector institutions to local conditions *Handbook of Obesity, Two-Volume Set* George A. Bray, Claude Bouchard, 2019-06-28 This 2 volume set comprises of the 3rd edition of Volume 1 and the 4th edition of Volume 2 both published in 2014 In recent years we've developed a much better grasp of the factors associated with the development of obesity New clinical trials discoveries related to drug use and greater understanding of the benefits of weight loss in obese patients have expanded the field of research in this area Reflecting our evolving understanding of causes and consequences this two volume set examines the history and prevalence of obesity and explores its biological behavioral environmental social and cultural determinants It discusses the consequences of obesity prevention evaluation of the overweight patient and a range of treatment options including behavior modification diet exercise medications and surgical procedures *Personalized Nutrition* Frans Kok, Laura Bouwman, Frank Desiere, 2007-08-24 From one person to the next optimal health is governed by a huge array of minor genetic differences When modulated by a variety

of food bioactives these differences result in changes in gene expression and subsequent phenotypic expression Combining biomedical and social science with contributions from leaders in both fields Personalized Nutri **Monthly Catalog of United States Government Publications** ,2004 **Annual Research Report** University of Florida. What is Effective Aid? Charles Kenny, 2006 There are significant weaknesses in some of the traditional justifications for assuming that aid will foster development This paper looks at what the cross country aid effectiveness literature and World Bank Operations Evaluation Department reviews have suggested about effective aid first in terms of promoting income growth and then for promoting other goals This review forms the basis for a discussion of recommendations to improve aid effectiveness and a discussion of effective aid allocation Given the multiple potential objectives for aid there is no one right answer However it appears that there are a number of reforms to aid practices and distribution that might help to deliver a more significant return to aid resources We should provide aid where institutions are already strong where they can be strengthened with the help of donor resources or where they can be bypassed with limited damage to existing institutional capacity The importance of institutions to aid outcomes as well as the fungibility of aid flows suggests that programmatic aid should be expanded in countries with strong institutions while project aid should be supported based on its ability to transfer knowledge and test new practices and support global public good provision rather than merely as a tool of financial resource transfer The importance of institutions also suggests that we should be cautious in our expectations regarding the results of increased aid flows
