*Climate Change and the Nation State* Anatol Lieven, 2020 The climate emergency is intensifying while international responses continue to falter In *Climate Change and the Nation State* Anatol Lieven outlines a revolutionary approach grounded in realist thinking This involves redefining climate change as an existential threat to nation states which it is and mobilizing both national security elites and mass nationalism He condemns Western militaries for neglecting climate change and instead prioritizing traditional but less serious threats Lieven reminds us that nationalism is the most important force in motivating people to care about the wellbeing of future generations The support of nationalism is therefore vital to legitimizing the sacrifices necessary to limit climate change and surviving and the effects of it some of which are now inevitable This will require greatly strengthened social and national solidarity across lines of class and race Throughout Lieven draws on historical examples to show how nationalism has helped enable past movements to implement progressive social reform Lieven strongly supports plans for a Green New Deal in the USA and Europe In order to implement and maintain such changes however it will be necessary to create dominant national consensus like those that enabled and sustained the original New Deal and welfare states in Europe Lieven criticizes sections of the environmentalist left for hindering this by their hostility to national interests their utopian political naivety their advancement of divisive cultural agendas and their commitment to open borders Radical and timely *Climate Change and the Nation State* is an essential contribution to the debate on how to deal with a climatic crisis that if unchecked will threaten the survival of Western democracies and every organized human society
