E. Speer,2015-06-17 Excerpt from Annual and Biennial Garden Plants Their Value and Uses 1911 With Full Instructions for Their Cultivation Annuals and Biennials are plants with limited lives An Annual is a plant that is raised from seed which germinates grows comes to maturity seeds and dies irrespective of frost all within the period of a year In Nature these seeds are scattered broadcast in the Autumn by the winds and other agents and quickly germinate thus reproducing themselves year by year Hardy Annuals are those which need no protection There are numerous Hardy Annuals that will stand a great amount of frost and bad weather if as Nature dictates they are sown in the Autumn But this is not the common practice For one thing a gardener usually is far too busy at that time of the year digging sweeping up leaves potting up geraniums attending to the glass houses and frames and many other duties that he is not justified in spending his time in sowing Annuals when he considers the Spring will do as well Neither does he wish to risk the Winter when he has enemies enough to contend with So in spite of Nature s teachings he sows in early Spring when he considers the risks are over Nevertheless
