*Research* Duane R. Monette, Thomas J. Sullivan, Cornell R. DeJong, 1998      **Randomized Controlled Trials** Phyllis Solomon, Mary M. Cavanaugh, Jeffrey Draine, 2009-02-02 Randomized controlled trials RCTs have been the gold standard for health and social service research for generations of professionals However even with the development of methods to accommodate a large number of professional perspectives and fields of intervention there is still no comprehensive resource for learning how to deal with the complex nature of RCTs conducted in community settings In this book the authors draw on their extensive experience conducting randomized controlled trials to compile a practical and accessible guide to RCTs in community based practice settings      *Social Work Research and Evaluation* Richard M. Grinnell, Jr., Yvonne A. Unrau, 2010-08-26 Over thirty years of input from instructors and students have gone into this popular research methods text resulting in a refined ninth edition that is easier to read understand and apply than ever before Using unthreatening language and real world examples it introduces students to the key concepts of evidence based practice that they will use throughout their professional careers It emphasizes both quantitative and qualitative approaches to research data collection methods and data analysis providing students with the tools they need to become evidence based practitioners      **Planning For Life** Liam Concannon, 2005-08-15 This book traces the development of services for people with disabilities and discusses how much things have really changed for today's service users since the days of asylums It also assesses whether the policy of involvement such as that outlined in *Valuing People* is achievable in practice or simply places unrealistic burdens on professionals and service users Based on findings from original research and interviews the author argues that involving people with learning disabilities in service planning is difficult to achieve successfully and is currently to a large extent tokenistic This area of challenging practice and emotive debate is brought to life by the voices of service providers carers and the service users themselves and illustrates the realities of working with people with learning disabilities *Planning for Life* is valuable and informative for students of social work social care and social policy and will be enlightening reading for those working with adults with learning disabilities in policy and in practice      **Psychological Testing of American Minorities** Ronald J. Samuda, 1998-01-21 The Second Edition of this classic work has been thoroughly updated and revised with an additional chapter providing a powerful rebuttal to *The Bell Curve* Ronald J Samuda presents a comprehensive analysis of the perspectives pitfalls fallacies issues consequences and trends in the use of standardized norm referenced tests with American minorities He demonstrates that testing continues to be the primary method for injecting pseudoscientific arguments which bolster discrimination prejudice and social injustice      **Dangerous Men** Matthew G. Yeager, 2021-01-22 This volume offers an important analysis of dangerous offender DO legislation and related designations in Canada It is a timely and important topic given the predominance of neo liberal and neo conservative conceptualizations of crime and its control in both contemporary Canada and the world especially from the psychoanalytic point of view The book develops a political economy of dangerousness through an examination of official definitions of high risk convicts A series of case studies interviews and

literature reviews serve to demonstrate various applications of dangerousness and situate these legal judicial processes within their broader ideological and political context This is a highly marginalized and disreputable penal population in criminology and the book argues that the label of dangerousness obscures the social and economic conditions that many convicts experience throughout their lives

*Challenges in Volunteer Management* Matthew Liao-Troth, 2008-09-01 Volunteer management has many challenges not the least of which is how we study it and view it Academics examine it from a variety of disciplines and practitioners experience it in a variety of contexts However both approaches have limitations In academia we go to public administration schools to learn about public and nonprofit management to business schools to apply the principles of private enterprise to nonprofit management to sociology departments to study the phenomena of volunteerism to psychology departments to understand the motives of volunteers and economics departments to examine the value or economic worth of volunteerism The liability of the academic approach is the segmentation of study and research into departmental areas The study of volunteers and volunteerism needs to cross all of these organizational and discipline boundaries to be fully appreciated and understood as a field of interest In contrast practitioners view volunteer management from their own unique experiences They try to gauge success in volunteer management based on what they have encountered in particular organizations towns cultures and countries in which they work As important as these insights are they are difficult to generalize beyond local settings Just because an individual has been successful in working with volunteers it does not mean that the lessons learned in one situation can be translated to others under all conditions The target audience for this volume is anyone who manages volunteers The goal of the volume is to demonstrate the breadth of thought on volunteer management both across disciplines and a wide range of settings in which volunteers work
