Conspiracy Theories in the Arab World Matthew Gray, 2010-07-12 Conspiracism, while not unique to the Middle East, is a salient feature of the political discourses of the region. The Decline of Nation-States after the Arab Spring Imad Salamey, 2016-10-14 Surveying the causes of the Arab Spring and revealing the governing trends arising from it, this book examines various international relation theories through the lens of the experiences of the countries in the Middle East and North Africa region. It takes the events of the Arab Spring as an outcome of globalization's double movement, whose integrative cultural, political, and security frameworks devastated nationally controlled economies, undermining the nation-state system and propagating a decentralized and communitarian-based governance structure. The consequences for many plural, diverse societies were twofold: autocratic nationalism was discarded while decentralized regimes representing communitarian-based politics came to the fore. The author reveals how the formulation of a new communitocratic order rests on the accommodation of this newly emerging communitarianism and explores the major drivers of political transformation, describing the emerging communities, forecasting their governing options, and the possible repercussions for the post-Arab Spring states.

Democratic Transitions in the Arab World Ibrahim Elbadawi, Samir A. Makdisi, 2017-01-05 A cross-country examination of authoritarianism and democracy in North Africa and the Middle East.

Civilizational Populism in Democratic Nation-States Ihsan Yilmaz, 2023-09-08 This edited book examines the growing worldwide phenomenon of civilizational populism in democratic nation-states and brings together research that explores this in a wide variety of religious, political, and geographic contexts. In doing so, the book shows how, from Europe to India and Pakistan and from Indonesia to the Americas, populists increasingly define national belonging through civilizational identity, claiming that the world can be divided into several religion-defined civilizations with incompatible values. The volume also discusses the complex relationship between civilizational populism, democracy, and nationalism and shows how nationalists often use civilizational identity to help define ingroups and outgroups within their society. With this, the book investigates the salience of the concept, its widespread and influential nature, and also explains how populists construct civilizational identities and the factors behind the rise of civilizational populism.

The Fall of the Turkish Model Cihan Tugal, 2016-02-23 Just a few short years ago, the Turkish Model was being hailed across the world. The New York Times gushed that Prime Minister Recep Tayyip Erdogan and his

Justice and Development Party AKP had effectively integrated Islam democracy and vibrant economics making Turkey according to the International Crisis Group the envy of the Arab world And yet a more recent CNN headline wondered if Erdogan had become a dictator In this incisive analysis Cihan Tugal argues that this development runs broader and deeper than Erdogan s increasing personal authoritarianism The problems are inherent in the very model of Islamic liberalism once lauded in the Western press that formed the basis of the AKP s ascendancy and rule since 2002 an intended marriage of neoliberalism and democracy And this model can also only be understood as a response to regional politics especially to the Iranian Model a marriage of corporatism and Islamic revolution The Turkish model was a failure in its home country and the dynamics of the Arab world made it a tough commodity to export Tugal s masterful explication of the demise of Islamic liberalism brings in Egypt and Tunisia once seen as the most likely followers of the Turkish model and provides a path breaking examination of their regimes and Islamist movements as well as paradigm shifting accounts of Turkey and Iran
