Arabic Thought and Its Place in History (Classic Reprint) De Lacy O'Leary, 2017-12-18 Excerpt from Arabic Thought and Its Place in History On developed and modified by circumstances As the Empire fell to pieces the body of culture became subject to varying conditions in different localities of which the divergence between the Greek speaking East and the Latin speaking West is the most striking example The introduction of Muslim influence through Spain is the one instance in which

we seem to get an alien culture entering into this Roman tradition and exercising a disturbing influence In fact this Muslim culture was at bottom essentially a part of the hellenistic roman material even the theology of Islam being formulated and developed from Hellenistic sources but Islam had so long lived apart from Christendom and its development had taken place in surroundings so different that it seems a strange and alien thing Its greatest power lay in the fact that it presented the old material in an entirely fresh form About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Arabic Thought and Its Place in History De Lacy O'leary, 2013-03-12 History traces the

evolution of the social structure in which the community exists to day There are three chief factors at work in this evolution racial descent culture drift and transmission of language the first of these physiological and not necessarily connected with the other two whilst those two are not always associated with each other In the evolution of the social structure the factor of first importance is the transmission of culture which is not a matter of heredity but due to contact for culture is learned and reproduced by imitation and not inherited Culture must be taken in the widest sense to include political social and legal institutions the arts and crafts religion and the various forms of intellectual life which show their presence in literature philosophy and otherwise all more or less connected and all having the common characteristic that they cannot be passed on by physical descent but must be learned in after life But race culture and language resemble one another in so far as it is true that all are multiplex and perpetually interwoven so that in each the lines of transmission seem rather like a tangled skein than an ordered pattern results proceed from a conflicting group of causes amongst which it is often difficult to apportion the relative influences

Translation Movement and Acculturation in the Medieval Islamic World Labeeb Ahmed Bsoul, 2019-09-06 This book investigates the transmission of knowledge in the Arab and Islamic world with particular attention to the translation of material from Greek, Persian and Sanskrit into Arabic and then from Arabic into Latin in medieval Western Europe. While most modern scholarly works have addressed contributions of Muslim scholars to the modern development of translation, Labeeb Ahmed Bsoul bases his study on Arabic classical literature and its impact upon modern translation. He focuses on the contributions made by prominent classical Christian and Muslim scholars, showcasing how their works and contributions to the field of knowledge are still relevant today.
