Shoko-Ken: A Late Medieval Daime Sukiya Style Japanese Tea-House Robin Noel Walker, 2012-11-12 First published in 2003 Built in 1628 at the Koto in temple in the precincts of Daitoku ji monastery in Kyoto the Shoko ken is a late medieval daime sukiya Japanese tea house It is attributed

to Hosokawa Tadaoki also known as Hosokawa Sansai an aristocrat and daimyo military leader and a disciple and friend of Sen no Riky This work is an extremely thorough look at one of the few remaining tea houses of the Momoyama era tea masters who studied with Sen no Rikyu The English language sources on Hosokawa Sansai and his tea houses have been exhaustively researched Many facts and minute observations have been brought together to give even the reader unfamiliar with Tea a sense of the presence which the tea house still manifests Plans, Sections and Elevations Richard Weston,2004 CD ROM contains files for all of the plans sections and elevations included in the book Transitions: Concepts + Drawings + Buildings Christine Hawley,2017-03-02 Most architectural books written by practising architects fall into two categories theoretical texts or monographs that describe and illustrate the author s projects This book combines both as it explores and illustrates the methodological journey required to translate a concept to a drawing and a drawing to a building While the term methodological might imply an Aristotelian logic there is no attempt here to rationalise the process of conception but instead an acknowledgement of an experimental approach that presupposes a subtle knowledge of the projects It shows the architect s fascination with the opaque and the not said and illustrates how architecture works through agreement and contradiction e g the built and the un built material and immaterial Organised into three essays Urban Collage Ground Surface Shadows and Lines the book examines how conceptual threads begin to compose a specific architectural design language and how they interweave from one direction to another Importantly the projects that illustrate the text also demonstrate how imperative or marginal the original ideas become and to an extent they demonstrate the design process its successes illogicality and failures The essays also discuss the importance of iteration through time where ideas may occasionally be developed as a linear process but more often emerge through a series of creative digressions Although the essays and the projects have dominant themes these should not be regarded as autonomous as throughout the development of both drawings and buildings ideas inevitably segue from one domain to another Ideas have both fluidity and the ability to transform **Makers of 20th Century Modern Architecture** Donald L. Metaphors in Architecture and Urbanism Andri Gerber,Brent Patterson,2014-03-15 Architecture and urbanism seem to be weak disciplines constantly struggling for a better understanding of their nature and disciplinary borders The huge amount of metaphors appearing in the discourse of both not only reference to their creative nature but also indicate their weakness and the missing piece strengthening their own understanding a definition of space for architecture and of city for urbanism But using metaphors in this field implies a problem though metaphors achieve to bring opposites together there remains the question how literal they can actually become in order to relate to these subjects properly In this volume several authors from various fields using different approaches discuss this question **Forme e funzioni degli elementi tecnici nell'architettura contemporanea** Rossella Corrao,2007 *Encyclopedia of Interior Design* Joanna Banham,1997-05 First
