International Handbook of Historical Archaeology Teresita Majewski, David Gaimster, 2009-06-07 In studying the past archaeologists have focused on the material remains of our ancestors Prehistorians generally have only artifacts to study and rely on the diverse material record for their understanding of past societies and their behavior Those involved in studying historically documented cultures not only have extensive material remains but also contemporary texts images and a range of investigative technologies to enable them to build a broader and more reflexive picture of how past societies communities and individuals operated and behaved Increasingly historical archaeology refers not to a particular period place or a method but rather an approach that interrogates the tensions between artifacts and texts irrespective of context In short historical archaeology provides direct evidence for how humans have shaped the world we live in today Historical archaeology is a branch of global archaeology that has grown in the last 40 years from its North American base into an increasingly global community of archaeologists each studying their area of the world in a historical context Where historical archaeology started as part of the study of the post Columbian societies of the United States and Canada it has now expanded to interface with the post medieval archaeologies of Europe and the diverse post imperial experiences of Africa Latin America and Australasia The 36 essays in the *International Handbook of Historical Archaeology* have been specially commissioned from the leading researchers in their fields creating a wide ranging digest of the increasingly global field of historical archaeology The volume is divided into two sections the first reviewing the key themes issues and approaches of historical archaeology today and the second containing a series of case studies charting the development and current state of historical archaeological practice around the world This key reference work captures the energy and diversity of this global discipline today

Cultural Heritage and Tourism in the Developing World Dallen J. Timothy, Gyan P. Nyaupane, 2009-05-18 *Cultural Heritage and Tourism in the Developing World* is the first book of its kind to synthesize global and regional issues challenges and practices related to cultural heritage and tourism specifically in less developed nations The importance of

preservation and management of cultural heritage has been realized as an increasing number of tourists are visiting heritage attractions. Although many of the issues and challenges developing countries face in terms of heritage management are quite different from those in the developed world, there is a lack of consolidated research on this important subject. This seminal book tackles the issues through theoretical discourse, ideas and problems that underlay heritage tourism in terms of conservation, management, economics and underdevelopment, politics and power, resource utilization, colonialism and various other antecedent notions that have shaped the development of heritage tourism in the less developed regions of the world. The book is comprised of two sections. The first section highlights the broader conceptual underpinnings, debates and paradigms in the realm of heritage tourism in developing regions. The chapters of this section examine heritage resources and the tourism product, protecting heritage relics, places and traditions, politics of heritage and the impacts of heritage tourism. The second section examines heritage tourism issues in specific regions including the Pacific Islands, South Asia, the Caribbean, China and Northeast Asia, South East Asia, Sub Saharan Africa, Central and Eastern Europe, the Middle East and North Africa and Latin America. Each region has unique histories, cultures, political traditions, heritages, issues and problems, and the way these issues are tackled vary from place to place. This volume develops frameworks that are useful tools for heritage managers, planners and policy makers, researchers and students in understanding the complexity of cultural heritage and tourism in the developing world. Unlike many other books written about developing regions, this book provides insiders' perspectives as most of the empirical chapters are authored by the individuals who live or have lived in the various regions and have a greater understanding of the region's culture, history and operational frameworks in the realm of cultural heritage. The richness of this indigenous or expert knowledge comes through as each regional overview elucidates the primary challenges and opportunities facing heritage and tourism managers in the less affluent areas of the world.

The Sumerian World Harriet Crawford, 2013-08-29 The Sumerian World explores the archaeology, history and art of southern Mesopotamia and its relationships with its neighbours from c. 3000-2000BC. Including material hitherto unpublished from recent excavations, the articles are organised thematically using evidence from archaeology, texts and the natural sciences. This broad treatment will also make the volume of interest to students looking for comparative data in allied subjects such as ancient literature and early religions. Providing an authoritative, comprehensive and up to date overview of the Sumerian period, written by some of the best qualified scholars in the field, The Sumerian World will satisfy students, researchers, academics and the knowledgeable layperson wishing to understand the world of southern Mesopotamia in the third millennium.
