Archaeological Survey Of The Kerak Plateau:

Archaeological Survey of the Kerak Plateau James Maxwell Miller,1991 **Le-David Maskil** Richard Elliott Friedman,William Henry Propp,2004 For the past half century David Noel Freedman has had an enormous impact on the study of the Bible both as an author and as an editor of the writings of others As his colleagues note in their comments at the beginning of this volume You are quintessentially the man of the book And perhaps what impresses us most is that your bibliography of hundreds of books is not limited to the extraordinary number of important books that you ve written yourself It also contains the books that you ve edited for others And we know what it means to have David Noel Freedman as one s editor For every page of manuscript that the author sends you you send back almost an equal number of pages of advice criticism corrections and improvements You can make a bad book good and a good book better And you can make its author a better scholar and a better writer In this volume his compatriots at the University of California San Diego contribute eight varied essays in celebration of his impact on them and in honor of his varied contributions to biblical studies

Material Evidence and Narrative Sources Daniella J. Talmon-Heller, Katia Cytryn-Silverman, 2014-10-23 This book is a collected volume that crosses traditional boundaries between methodologies Each of its sixteen articles is based on imaginative combinations of data provided by excavations artifacts monuments urban topography rural layouts historical narratives and or archival records The volume as a whole demonstrates the effectiveness of interdisciplinary research applied to historical cultural and archaeological problems Its five sections Economics and Trade Governmental Authority Material Culture Changing Landscapes and Monuments bring forth original studies of the medieval Ottoman and modern Middle East amongst others of voiceless and silenced social groups Contributors are Nitzan Amitai Preiss Jere L Bacharach Simonetta Calderini Delia Cortese Katia Cytryn Silverman Miriam Frenkel Haim Goldfus Hani Hamza Stefan Heidemann Miriam K hn Ayala Lester Nimrod Luz Yoram Meital Daphna Sharef Davidovich Oren Shmueli Yasser Tabbaa Daniella Talmon Heller and Bethany Walker Human Ecology in the Wadi Al-Hasa J. Brett Hill, 2006-02 Amid mounting concern over modern environmental degradation archaeologists around the world are demonstrating the long history of such processes and the way they have shaped current landscapes A growing body of evidence shows how humans have modified their environment for millennia and contemporary problems cannot be understood without an adequate sense of this ecological past and the role of humans in it The Wadi al Hasa a large canyon draining the Transjordan Plateau into the Dead Sea has been the location of repeated cycles of settlement and land use for thousands of years This book focuses on changing land use patterns and their relationship to socio political organization Using a combination of archaeological and environmental data Brett Hill examines the human ecology of agriculture and pastoralism from the beginnings of domestication through the rise and collapse of complex societies Models of land use often consider political complexity as an important factor affecting mismanagement Together with GIS erosion modeling and settlement pattern analysis Hill evaluates the archaeological historical and environmental record spanning the Holocene to show how land use was affected by the rise of centralized authority Yet populations in the Hasa maintained the ability to resist authority and return to a nomadic life when it became advantageous This process emphasizes the power of local groups to pursue alternative strategies when their interests

diverged from those of elites creating a dynamic that reshapes the landscape each generation Hill's analysis contributes significantly to our understanding of the history of human ecology in the southern Levant wherein current debates are complicated by research at different scales and by a lack of consensus on the importance of localized phenomena It not only complements existing research but also seeks to refine models of processes in human ecology to demonstrate the effect of political organization on land mismanagement
