Explores the connections between modern day politics and the social context of archaeological practice and various underutilized approaches to archaeological interpretation. Designed for student use.

Archaeologies of the Middle East Susan Pollock, Reinhard Bernbeck, 2005 Archaeology is a social practice that is thoroughly embedded in the contemporary world. This is nowhere clearer than in the Middle East, a region that is today an epicenter of political and economic tensions and ongoing conflicts. Archaeologies of the Middle East: Critical Perspectives provides an innovative introduction to the archaeology of this fascinating region spanning 100 000 years from the Paleolithic to Hellenistic times and a window on both its past and present. Archaeologies of the Middle East explores the connections between modern day politics and the social context of archaeological practice and underutilized approaches to archaeological interpretation such as examining the ways in which scholars write about the past, the portrayal of archaeology in the news media, and the impacts of and on archaeology in volatile political situations. Written by some of the top archaeologists of the Middle East, this volume integrates scholars from diverse backgrounds with a wide range of interests and intellectual approaches to their research. Archaeologies of the Middle East is carefully designed for student use and focuses on key themes and time periods rather than offering a static overview of the history of the region.

Living Communities and Their Archaeologies in the Middle East Rick Bonnie, Marta Lorenzon, Suzie Thomas, 2023-09-29 This volume presents theoretical ideas, case studies, and reflective insights on community archaeology across the Middle East with contributions by scholars working in and from Iraq, Israel, Jordan, Palestine, and Syria. The chapters represent a multitude of insights from contemporary public archaeology practice, drawing on theoretical frameworks and discussing the realities of challenges and opportunities presented by opening up archaeological experiences to wider publics in different social and political settings. In particular, the volume focuses on the following three themes: 1. defining and reflecting on community in community archaeology; 2. which archaeologies to employ in community archaeology; and 3. measuring the success and failure of community archaeology. In addressing these issues, the chapters reflect different historical trajectories and cultures that enable us to find similarities and differences in the theory and practice of community archaeology. In more recent decades, a shift has been noticed among both national authorities and foreign archaeological expeditions with more emphasis on local heritage experiences. However, this frequently took the form of guiding and introducing communities to their heritage. Only more recently, local voices have become more heard in definitions of heritage and decisions on preservation matters, with more projects tying these voices into their research objectives. This volume

presents several projects that combine postcolonial approaches citizen participation and community work across the Middle East By focusing especially on this geographical area the volume also reflects upon the current state of public and community archaeology in this unique and complex region adding to the already rich literature from the rest of the world The Middle East has a long fascinating but also complicated history of archaeological investigation deeply entrenched in colonization and more recently in the decolonization process The involvement and social values of the associated communities have often been overlooked in academic discussions This book aims to redress that imbalance and present original research that reflects on the work of current scholars and practitioners and draws similarities and differences from diverse cultures

Controlling the Past, Owning the Future Ran Boytner, Lynn Swartz Dodd, Bradley J. Parker, 2010-12-15 What are the political uses and misuses of archaeology in the Middle East In answering this question the contributors to this volume lend their regional expertise to a variety of case studies including the Taliban s destruction of Buddhas in Afghanistan the commercialization of archaeology in Israel the training of Egyptian archaeology inspectors and the debate over Turkish identity sparked by the film Troy among other provocative subjects Other chapters question the ethical justifications of archaeology in places that have alternative engagements with the material past In the process they form various views of the role of the archaeologist from steward of the historical record to agent of social change The diverse contributions to this volume share a common framework in which the political use of the past is viewed as a process of social discourse According to this model political appropriations are seen as acts of social communication designed to accrue benefits to particular groups Thus the contributors pay special attention to competing social visions and the filters these impose on archaeological data But they are also attentive to the potential consequences of their own work Indeed as the editors remind us people s lives may be affected sometimes dramatically because of the material remains that surround them Rounding out this important volume are critiques by two top scholars who summarize and synthesize the preceding chapters

Living Communities and Their Archaeologies in the Middle East Rick Bonnie, Marta Lorenzon, Suzie Thomas, 2023-09-29 Scholars working in and from Iraq Israel Jordan Palestine and Syria present theoretical frameworks case studies and reflective insights on community archaeology projects across the Middle East

Finding Antiquity, Making the Modern Middle East Guillemette Crouzet, Eva Miller, 2025-06-12 This volume presents innovative studies of how the emerging disciplines of archaeology and ancient history shaped the modern Middle East and how they were in turn shaped by competing visions and agendas of empires and new nations The Middle East was a region constructed through its putatively unique relationship to the whole world s past and its special relevance for the destiny of empires and nations Over the course of the nineteenth and early twentieth centuries European empires fought for influence and control over this cradle of civilization empire and monuments and local powers and people in the Middle East worked with and against these historical and heritage frameworks in their own quests for self determination In this volume contributors from the fields of history archaeology and heritage explore how

historical consciousness about the Middle East was contested in the nineteenth and early twentieth century through excavation and interpretation of the past Chapters span West Asia and North Africa covering Turkey Iraq Iran Syria Lebanon Israel Palestine Egypt and Tunisia and the imperial history of Britain France Germany and the Ottoman Empire The result is an original contribution to our understanding of the origins and influence of Middle Eastern archaeology which resonates today in contemporary discussions on heritage discourses and practices

Historical Archaeology and Heritage in the Middle East Ruth Young, 2019-01-14 Landlord villages dominated Iranian land tenure for hundreds of years whereby one powerful landlord owned the village structures surrounding farmland and to all intents and purposes the village occupants themselves a system that in some cases remained in place up to the 1979 Islamic Revolution In Oman mud brick oases were home to most of the rural population right up until Sultan Qaboos came to power in 1970 and required inhabitants of mud brick houses to relocate into new concrete block buildings Historical Archaeology and Heritage in the Middle East explores these everyday rural communities in Iran and Oman in the 19th and 20th centuries through a combination of building analysis excavation artefact analysis and ethnographic interviews Drawing on the results of original field projects the book considers new ways of exploring traditional lifeways giving voice to hitherto largely ignored sections of the population and offers new and different ways of thinking about how these people lived and what shaped their lives and the impact of major political and social changes on them Place memory and belonging are considered through the lens of material culture within these villages The first of its kind the book brings together methodologies research questions and themes that have never been used or addressed in the Middle East Helping to establish historical archaeology in the Middle East and providing new ways in which the memorable quotidian past can be exploited for its social and economic value in contemporary community and heritage developments it is an ideal resource for students scholars and practitioners of historical archaeology and heritage of and in the Middle East

From Archaeology to Spectacle in Victorian Britain Shawn Malley,2016-04-15 In his examination of the excavation of ancient Assyria by Austen Henry Layard Shawn Malley reveals how by whom and for what reasons the stones of Assyria were deployed during a brief but remarkably intense period of archaeological activity in the mid nineteenth century His book encompasses the archaeological practices and representations that originated in Layard s excavations radiated outward by way of the British Museum and Layard s best selling *Nineveh and Its Remains* 1849 and were then dispersed into the public domain of popular amusements That the stones of Assyria resonated in debates far beyond the interests of religious and scientific groups is apparent in the prevalence of poetry exhibitions plays and dioramas inspired by the excavation Of particular note correspondence involving high ranking diplomatic personnel and museum officials demonstrates that the treasures brought home to fill the British Museum served not only as signs of symbolic conquest but also as covert means for extending Britain s political and economic influence in the Near East Malley takes up issues of class and influence to show how the middle class Layard s celebrity status both advanced and threatened aristocratic values Tellingly the excavations prompted disturbing questions about the perils of imperial rule that framed discussions of the social and political conditions which brought England to the brink of revolution in 1848 and resurfaced with a vengeance during the Crimean crisis In the provocative conclusion of this meticulously documented and suggestive book Malley points toward the striking parallels between the history of Britain s imperial investment in Mesopotamia and the contemporary geopolitical uses and abuses of Assyrian antiquity in post invasion Iraq

A Historical Archaeology of the Ottoman Empire Uzi Baram,Lynda Carroll,2006-03-16 Archaeology in the Middle East and the Balkans rarely focuses on the recent past as a result archaeologists have largely ignored the material remains of the Ottoman Empire Drawing on a wide variety of case studies and essays this volume documents the emerging field of Ottoman archaeology and the relationship of this new field to anthropological classical and historical archaeology as well as Ottoman studies

Archaeology and The Politics of Vision in a Post-Modern Context Vítor Oliveira Jorge,Julian Tomas,2009-01-14 Archaeology is intimately connected to the modern regime of vision A concern

with optics was fundamental to the Scientific Revolution and informed the moral theories of the Enlightenment And from its inception archaeology was concerned with practices of depiction and classification that were profoundly scopical in character Drawing on both the visual arts and the depictive practices of the sciences employing conventionalised forms of illustration photography and spatial technologies archaeology presents a paradigm of visualised knowledge However a number of thinkers from Jean Paul Sartre onwards have cautioned that vision presents at once a partial and a politicised way of apprehending the world In this volume authors from archaeology and other disciplines address the problems that face the study of the past in an era in which realist modes of representation and the philosophies in which they are grounded in are increasingly open to question

Handbook of Postcolonial Archaeology Jane Lydon, Uzma Z Rizvi, 2016-07 The contributors to this volume themselves from six continents and many representing indigenous and minority communities and disadvantaged countries suggest strategies to strip archaeological theory and practice of its colonial heritage and create a discipline sensitive to its inherent inequalities

International Handbook of Historical Archaeology Teresita Majewski, David Gaimster, 2009-06-07 In studying the past archaeologists have focused on the material remains of our ancestors Prehistorians generally have only artifacts to study and rely on the diverse material record for their understanding of past societies and their behavior Those involved in studying historically documented cultures not only have extensive material remains but also contemporary texts images and a range of investigative technologies to enable them to build a broader and more reflexive picture of how past societies communities and individuals operated and behaved Increasingly historical archaeology refers not to a particular period place or a method but rather an approach that interrogates the tensions between artifacts and texts irrespective of context In short historical archaeology provides direct evidence for how humans have shaped the world we live in today Historical archaeology is a branch of global archaeology that has grown in the last 40 years from its North American base into an increasingly global community of archaeologists each studying their area of the world in a historical context Where historical archaeology started as part of the study of the post Columbian societies of the United States and Canada it has now expanded to interface with the post medieval archaeologies of Europe and the diverse post imperial experiences of Africa Latin America and Australasia The 36 essays in the *International Handbook of Historical Archaeology* have been specially commissioned from the leading researchers in their fields creating a wide ranging digest of the increasingly global field of historical archaeology The volume is divided into two sections the first reviewing the key themes issues and approaches of historical archaeology today and the second

containing a series of case studies charting the development and current state of historical archaeological practice around the world This key reference work captures the energy and diversity of this global discipline today The Oxford Handbook of Islamic Archaeology Bethany J. Walker, Timothy Insoll, Corisande Fenwick, 2020 Islamic archaeology is young discipline emerging only over the course of the 1980s and 1990s The Oxford Handbook of Islamic Archaeology is the first work of its kind to cover the archaeology of the Islamic world on a global scale from North Africa to China and Europe to sub Saharan Africa **The Oxford Companion to Archaeology** Neil Asher Silberman, 2012-11 The second edition of The Oxford Companion to Archaeology is a thoroughly up to date resource with new entries exploring the many advances in the field since the first edition published in 1996 In 700 entries the second edition provides thorough coverage to historical archaeology the development of archaeology as a field of study and the way the discipline works to explain the past In addition to these theoretical entries other entries describe the major excavations discoveries and innovations from the discovery of the cave paintings at Lascaux to the deciphering of Egyptian hieroglyphics and the use of luminescence dating Recent developments in methods and analytical techniques which have revolutionized the ways excavations are performed are also covered as well as new areas within archeology such as cultural tourism and major new sites which have expanded our understanding of prehistory and human developments through time In addition to significant expansion first edition entries have been thoroughly revised and updated to reflect the progress that has been made in the last decade and a half
