Kohl, Mara Kozelsky, Nachman Ben-Yehuda, 2008-11-15 When political geography changes how do reorganized or newly formed states justify their rule and create a sense of shared history for their people Often the essays in Selective Remembrances reveal they turn to archaeology employing the field and its findings to develop nationalistic feelings and forge legitimate distinctive national identities Examining such relatively new or reconfigured nation states as Iran Iraq Turkey

Israel Russia Ukraine India and Thailand Selective Remembrances shows how states invoke the remote past to extol the glories of specific peoples or prove claims to ancestral homelands Religion has long played a key role in such efforts and the contributors take care to demonstrate the tendency of many people including archaeologists themselves to view the world through a religious lens which can be exploited by new regimes to suppress objective study of the past and justify contemporary political actions The wide geographic and intellectual range of the essays in Selective Remembrances will make it a seminal text for archaeologists and historians

Defining the Sacred Nicola Laneri,2015-05-08 Religion is a phenomenon that is inseparable from human society It brings about a set of emotional ideological and practical elements that are pervasive in the social fabric of any society and characterizable by a number of features These include the establishment of intermediaries in the relationship between humans and the divine the construction of ceremonial places for worshipping the gods and practicing ritual performances and the creation ritual paraphernalia Investigating the religious dimensions of ancient societies encounters problems in defining such elements especially with regard to societies that lack textual evidences and has tended to lead towards the identification of differentiation between the mental dimension related to religious beliefs and the material one associated with religious practices resulting in a separation between scholars able to investigate and possibly reconstruct ritual practices i e archaeologists and those interested in defining the realm of ancient beliefs i e philologists and religious historians The aim of this collection of papers is to attempt to bridge these two dimensions by breaking down existing boundaries in order to form a more comprehensive vision of religion among ancient Near Eastern societies This approach requires that a higher consideration be given to those elements either artificial buildings objects texts etc or natural landscapes animals trees etc that are created through a materialization of religious beliefs and practices enacted by members of communities These issues are addressed in a series of specific case studies covering a broad chronological framework that from the Pre pottery Neolithic to the Iron Age Cover illustration German Archaeological Institute photo N Becker

The Changing Landscape of Israeli Archaeology Hayah Katz,2023-07-31 Focused on the connections between archaeology and Israeli society this book examines the development of Israeli archaeological research taking historical sociological and political contexts into account Adopting a Foucauldian framework of power and knowledge the author begins

by focusing on archaeological knowledge as a hegemonic discipline buttressing the national Zionist identity after the establishment of the State of Israel The liberalization of political culture in the late 1970s it is argued opened the door for a more democratized archaeological discipline Making use of in depth interviews with archaeologists belonging to various groups in Israeli society as well as documents from the Israel State Archives ISA the book touches on multiple fields of research including Near Eastern archaeology religious Jewish society Israel Palestine relations and the status of women in Israel Moreover although the book deals with the sociology of Israeli archaeology specifically the author s comparative approach which highlights the mirroring of social processes and the archaeological discipline can also be applied to other societies The book will be of interest to researchers and students in the fields of archaeology sociology and Israel Studies as well as to readers with a general interest in the archaeology of the Holy Land **Ancient Ammon B.**

Faust,2020-09-11 Israelite religions have always fascinated scholars Initial studies used the Bible as their main source of information and attempted to read it critically in order to learn about the religion of ancient Israel With the advent of modern research in the Near East more and more information on other Ancient Near Eastern religions was accumulated and initially used to illuminate Israelite religious practices as described in the Bible but gradually led to challenging some of the accepted truisms The new information was collected mainly through archaeological excavations and archaeology had gradually become a major player in the study of ancient Israelite religion s and religious practices The massive amount of information on the various subthemes related to Israelite religions the shifting trends in scholarship the multiplicity of approaches and the interdisciplinary nature of the field means that no single scholar can master all the data today Indeed there is currently no comprehensive and updated book that covers all or even most aspects pertaining to Israelite religion s This volume is a partial attempt to fill some of this lacuna The volume includes a number of broad summarizing studies presenting readers with the up to date state of the research on a number of important issues from Solomon s temple to broader studies of the loci of cultic activity in ancient Israel through to analysis of the difference between the official and popular expression of religion the place of women in Israelite cult s similarities and differences between the religious practices in Israel and Judah and those of other Iron Age religions and the religion of some of Israel s neighbors to the role of zooarchaeology in the study of religion ancient Israelite festivals and more *Jewish Studies on Premodern Periods* Carl S. Ehrlich,Sara R.

the social scientific history and society the textual texts and literature the material art architecture and archaeology and the philosophical religion and thought Some essays offer a comprehensive look at the state of the field while others look at specific examples illustrative of their temporal and thematic areas of inquiry The volume presents a snapshot of the state of the field encompassing new perspectives directions and methodologies as well as the questions that will animate the field as it develops further It will be of interest to scholars and students in the field as well as to educated readers looking to understand the changing face of Jewish studies as a discipline advancing human knowledge
