involving positive choices and providing new opportunities A recurring theme in many chapters is that of the heterogeneity of the group of people who are variously categorized as older aged elderly or over 65 The contributors review the literature analytically in a way that reveals not only current theoretical and methodological approaches to communication and aging research but also sets the future agenda This handbook will be of great interest to scholars and researchers in gerontology developmental psychology and communication and in this updated edition will continue to play a key role in the study of communication and aging
