14 Great Tales Of Esp:

14 Great Tales of ESP Idella Purnell Stone, 1969 *The Mechanics of Wonder* Gary Westfahl, 1998-01-01 This is a sustained argument about the idea of science fiction by a renowned critic Overturning many received opinions it is both controversial and stimulating Much of the controversy arises from Westfahl's resurrection of Hugo Gernsback for decades a largely derided figure as the true creator of science fiction Following an initial demolition of earlier critics Westfahl argues for Gernsback's importance His argument is fully documented showing a much greater familiarity with early American science fiction particularly magazine fiction than previous academic critics or historians After his initial chapters on Gernsback he examines the way in which the Gernsback tradition was adopted and modified by later magazine editors and early critics This involves a re-evaluation of the importance of John W Campbell to the history of science fiction as well as a very interesting critique of Robert Heinlein's *Beyond the Horizon* one of the seminal texts of American science fiction In conclusion Westfahl uses the theories of Gernsback and Campbell to develop a descriptive definition of science fiction and he explores the ramifications of that definition *The Mechanics of Wonder* will arouse debate and force the questioning of presuppositions No other book so closely examines the origins and development of the idea of science fiction and it will stand among a small number of crucial texts with which every science fiction scholar or prospective science fiction scholar will have to read **The Oxford Handbook of Science Fiction** Rob Latham, 2014 The Oxford Handbook of Science Fiction attempts to describe the historical and cultural contours of SF in the wake of technoculture studies Rather than treating the genre as an isolated aesthetic formation it examines SF's many lines of cross-pollination with technocultural realities since its inception in the nineteenth century showing how SF's unique history and subcultural identity has been constructed in ongoing dialogue with popular discourses of science and technology The volume consists of four broadly themed sections each divided into eleven chapters Section I Science Fiction as Genre considers the internal history of SF literature examining its characteristic aesthetic and ideological modalities its animating social and commercial institutions and its relationship to other fantastic genres Section II Science Fiction as Medium presents a more diverse and ramified understanding of what constitutes the field as a mode of artistic and pop cultural expression canvassing extra-literary manifestations of SF ranging from film and television to videogames and hypertext to music and theme parks Section III Science Fiction as Culture examines the genre in relation to cultural issues and contexts that have influenced it and been influenced by it in turn the goal being to see how SF has helped to constitute and define important sub-cultural groupings social movements and historical developments during the nineteenth twentieth and twenty-first centuries Finally Section IV Science Fiction as Worldview explores SF as a mode of thought and its intersection with other philosophies and large-scale perspectives on the world from the Enlightenment to the present day *Catalog of Copyright Entries. Bermuda Triangle, antigravity: are we talking about science fiction or pseudoscience? Sometimes it is difficult to tell the difference. Both pseudoscience and science fiction (SF) are creative endeavours that have little in common with academic science beyond the superficial trappings of jargon and subject matter. The most obvious difference between the two is that pseudoscience is presented as fact, not fiction. Yet like SF and unlike real science, pseudoscience is driven by a desire to please an audience in this case, people who want to believe. This has led to significant cross-fertilization between the two disciplines. SF authors often draw on real pseudoscientific theories to add verisimilitude to their stories, while on other occasions pseudoscience takes its cue from SF, the symbiotic relationship between ufology and Hollywood being a prime example of this. This engagingly written, well-researched and richly illustrated text explores a wide range of intriguing similarities and differences between pseudoscience and the fictional science found in SF. Andrew May has a degree in Natural Sciences from Cambridge University and a PhD in astrophysics from Manchester University. After many years in academia and the private sector, he now works as a freelance writer and scientific consultant. He has written pocket biographies of Newton and Einstein as well as contributing to a number of popular science books. He has a lifelong interest in science fiction and has had several articles published in *Fortean Times* magazine.

[Mind Reading as a Cultural Practice](#) Laurens Schlicht, Carla Seemann, Christian Kassung, 2020-04-04. This book provides a genealogical perspective on various forms of mind reading in different settings. We understand mind reading in a broad sense as the twentieth-century attempt to generate knowledge of what people held in their minds with a focus on scientifically based governmental practices. This volume considers the techniques of mind reading within a wider perspective of discussions about technological innovation within neuroscience, the juridical system, occult practices and discourses within the wider field of parapsychology and magical beliefs. The authors address the practice of and discourses on mind reading as they form part of the consolidation of modern governmental techniques. The collected contributions explore the question of how these techniques have been epistemically formed, institutionalized, practiced, discussed and how they have been used to

shape forms of subjectivities collectively through human consciousness or individually through the criminal deviant or spiritual subject The first part of this book focuses on the technologies and media of mind reading while the second part addresses practices of mind reading as they have been used within the juridical sphere The volume is of interest to a broad scholarly readership dealing with topics in interdisciplinary fields such as the history of science history of knowledge cultural studies and techniques of subjectivization *E.T. Newman, 2020-11-27 Around the year 1200 the Cistercian Engelhard of Langheim dedicated a collection of monastic stories to a community of religious women Martha G Newman explores how this largely unedited collection of tales about Cistercian monks illuminates the religiosity of Cistercian nuns As did other Cistercian storytellers Engelhard recorded the miracles and visions of the order's illustrious figures but he wrote from Franconia in modern Germany rather than the Cistercian heartland His extant texts reflect his interactions with non Cistercian monasteries and with Langheim's patrons rather than celebrating Bernard of Clairvaux Engelhard was conservative interested in maintaining traditional Cistercian patterns of thought Nonetheless by offering to women a collection of narratives that explore the oral qualities of texts the nature of sight and the efficacy of sacraments Engelhard articulated a distinctive response to the social and intellectual changes of his period In analyzing Engelhard's stories Newman uncovers an understudied monastic culture that resisted the growing emphasis on the priestly administration of the sacraments and the hardening of gender distinctions Engelhard assumed that monks and nuns shared similar interests and concerns and he addressed his audiences as if they occupied a space neither fully sacerdotal nor completely lay neither scholastic nor unlearned and neither solely male nor only female His exemplary narratives depict the sacramental value of everyday objects and behaviors whose efficacy relied more on individual spiritual formation than on sacerdotal action By encouraging nuns and monks to imagine connections between heaven and earth Engelhard taught faith as a learned disposition Newman's study demonstrates that scholastic questions about signs sacraments and sight emerged in a narrative form within late twelfth century monastic communities **Folktales of the Jews, V. 3 (Tales from Arab Lands)** Dan Ben Amos, 2011-05-01 Thanks to these generous donors for making the publication of the books in this series
