Lynn, 2014 Following two journeys Kit Carson's 1864 military expedition from Fort Bascom to Adobe Walls and Alvin Lynn's journey to document what happened are told *Adobe Walls* T. Lindsay Baker, Billy R. Harrison, 1986-04-04 In the spring of 1874 a handful of men and one woman set out for the Texas Panhandle to seek their fortunes in the great buffalo hunt Moving south to follow the herds they intended to establish a trading post to serve the hunter or hide men At a place called Adobe Walls they dug blocks from the sod and built their center of operations After operating for only a few months the post was attacked one sultry June morning by angry members of several Plains Indian tribes whose physical and cultural survival depending on the great bison herd that were rapidly shrinking before the white men's guns Initially defeated that attacking Indians retreated But the defenders also retreated leaving the deserted post to

be burned by Indians intent on erasing all traces of the white man's presence. Nonetheless, traces did remain and in the ashes and dirt were buried minute details of the hide men's lives and the battle that so suddenly changed them. A little more than a century later, white men again dug into the sod at Adobe Walls. The nineteenth-century men dug for profits, but the modern hunters were looking for the natural time capsule inadvertently left by those earlier adventurers. The authors of this book, a historian and an archeologist, have dug into the sod and into far-flung archives to sift reality from the long romanticized story of Adobe Walls, its residents, and the Indians who so fiercely resented their presence. The full story of Adobe Walls now tells us much about the life and work of the hide men, about the dying of the Plains Indian culture, and about the march of white commerce across the frontier.

The Carriage Trade Thomas A. Kinney, 2004-10-13 Co-Winner of the 2005 Hagley Business History Book Prize given by the Business History Conference. In 1926 the Carriage Builders National Association met for the last time, signaling the automobile's final triumph over the horse-drawn carriage. Only a decade earlier, carriages and wagons were still a common sight on every Main Street in America. In the previous century, carriage building had been one of the largest and most dynamic industries in the country. In this sweeping study of a forgotten trade, Thomas A. Kinney extends our understanding of nineteenth-century American industrialization far beyond the steel mill and railroad. The legendary Studebaker Brothers Manufacturing Company in 1880 produced a hundred wagons a day, one every six minutes. Across the country, smaller factories fashioned vast quantities of buggies, farm wagons, and luxury carriages. Today, if we think of carriage and wagon at all, we assume it merely foreshadowed the automobile industry. Yet the carriage industry epitomized a batch-work approach to production that flourished for decades. Contradicting the model of industrial development in which hand tools, small firms, and individual craftsmanship simply gave way to mechanized factories, the carriage industry successfully employed small-scale business and manufacturing practices throughout its history. The Carriage Trade traces the rise and fall of this heterogeneous industry from the pre-industrial shop system to the coming of the automobile, using as case studies Studebaker, the New York-based luxury carriage maker, Brewsters, and dozens of smaller firms from around the country. Kinney also explores the experiences of the carriage and wagon worker over the life of the industry. Deeply researched and strikingly original, this study contributes a vivid chapter to the story of America's industrial revolution.

Report ,2001 **Beginnings of Range Management** David A. Prevedel,Curtis M. Johnson,2005 *Making Whiteness*
Grace Elizabeth Hale,2010-08-25 Making Whiteness is a profoundly important work that explains how and why whiteness came to be such a crucial embattled and distorting component of twentieth century American identity In intricately textured detail and with passionately mastered analysis Grace Elizabeth Hale shows how when faced with the active citizenship of their ex slaves after the Civil War white southerners re established their dominance through a cultural system based on violence and physical separation And in a bold and transformative analysis of the meaning of segregation for the nation as a whole she explains how white southerners creation of modern whiteness was beginning in the 1920s taken up by the rest of the nation as a way of enforcing a new social hierarchy while at the same time creating the illusion of a national egalitarian consumerist democracy By showing the very recent historical making of contemporary American whiteness and by examining how the culture of segregation in all its murderous contradictions was lived Hale makes it possible to imagine a future outside it Her vision holds out the difficult promise of a truly democratic American identity whose possibilities are no longer limited and disfigured by race The Historic Architecture of Bay City, Michigan Dale Patrick Wolicki,1998
