1979 A Handful Of Stars:

The Rise and Fall of American Science Fiction, from the 1920s to the 1960s Gary Westfahl, 2019-10-04 By examining important aspects of science fiction in the twentieth century this book explains how the genre evolved to its current state. Close critical attention is given to topics including the art that has accompanied science fiction the subgenres of space opera and hard science fiction the rise of SF anthologies and the burgeoning impact of the marketplace on authors. Included are in depth studies of key texts that contributed to science fiction's growth including Philip Francis Nowlan's first Buck Rogers story the first published stories of A E van Vogt and the early juveniles of Isaac Asimov Arthur C Clarke and Robert Heinlein.

Physics of Solar and Stellar Coronae: G.S. Vaiana Memorial

Symposium Jeffrey L. Linsky, Salvatore Serio, 2012-12-06 The original plans for a meeting to celebrate the second centenary of the Astronomical Observatory of Palermo were for a celebration with a double character. The gathering was to have both a historical character appropriate for a bicentennial and a technical character to note and chronicle the new phase of the history of the Observatory which has prospered in parallel with the development of this fairly recent topic in astronomical research the physics of stellar and solar coronae. After the untimely death of the Observatory's Director Giuseppe S. Vaiana Pippo to his many friends a number of colleagues and friends insisted that the celebration should nevertheless be held and should be dedicated to this farsighted scientist who stimulated the development of coronal physics from the early x-ray observations of the solar corona to the recognition of coronae as an observable feature of nearly all stars. This memorial dedication did not change the character of the meeting which was held in Palermo from 22 to 26 June 1992 as his contributions are very alive in the papers presented at the meeting and collected here. Pippo Vaiana has certainly achieved his place in the history of Astronomy.
