Delivering the People's Message Julia R. Azari, 2014-03-20 Presidents have long invoked electoral mandates to justify the use of executive power In *Delivering the People's Message* Julia R Azari draws on an original dataset of more than 1 500 presidential communications as well as primary documents from six presidential libraries to systematically examine choices made by presidents ranging from Herbert Hoover in 1928 to Barack Obama during his 2008 election Azari argues that Ronald Reagan's election in 1980 marked a shift from the modern presidency formed by Franklin Delano Roosevelt to what she identifies as a more partisan era for the presidency This partisan model is a form of governance in which the president appears to require a popular mandate in order to manage unruly and deeply contrary elements within his own party and succeed in the face of staunch resistance from the opposition party Azari finds that when the presidency enjoys high public esteem and party polarization is low mandate rhetoric is less frequent and employs broad themes By contrast presidents turn to mandate rhetoric when the office loses legitimacy as in the wake of Watergate and Vietnam and during periods of intense polarization In the twenty first century these two factors have converged As a result presidents rely on mandate rhetoric to defend their choices to supporters and critics alike simultaneously creating unrealistic expectations about the electoral promises they will be able to fulfill

### **Social Media in Rural China**

Tom McDonald, 2016-09-13 China's distinctive social media platforms have gained notable popularity among the nation's vast number of internet users but has China's countryside been left behind in this communication revolution Tom McDonald spent 15 months living in a small rural Chinese community researching how the residents use social media in their daily lives His ethnographic findings suggest that far from being left behind many rural Chinese people have already integrated social media into their everyday experience Throughout his ground breaking study McDonald argues that social media allows rural people to extend and transform their social relationships by deepening already existing connections with friends known through their school work or village while also experimenting with completely new forms of relationships through online interactions with strangers particularly when looking for love and romance By juxtaposing these seemingly opposed relations rural social media users are able to use these technologies to understand, capitalise on and challenge the notions of morality that underlie rural life

*Why Americans Hate the Media and How It Matters* Jonathan M. Ladd, 2011-12-05 As recently as the early 1970s the news media was one of the most respected institutions in the United States Yet by the 1990s this trust had all but evaporated Why has confidence in the press declined so dramatically over the past 40 years And has this change shaped the public's political behavior This book examines waning public trust in the institutional news media within the context of the American political system and looks at how this lack of confidence has altered the ways people acquire political information and form electoral preferences Jonathan Ladd argues that in the 1950s 60s and early 70s competition in American party politics and the media industry reached historic lows When competition later intensified in both of these realms the public's distrust of the institutional media grew leading the public to resist the mainstream press's information about policy outcomes and turn toward alternative partisan media outlets As a result public beliefs and voting behavior are now increasingly shaped by partisan predispositions Ladd contends that it is not realistic or desirable to suppress party and media competition to the

levels of the mid twentieth century rather in the contemporary media environment new ways to augment the public's knowledgeability and responsiveness must be explored Drawing on historical evidence experiments and public opinion surveys this book shows that in a world of endless news sources citizens trust in institutional media is more important than ever before The Future of Newspapers Bob Franklin, 2013-09-13 The future of newspapers is hotly contested Pessimistic pundits predict their imminent demise while others envisage a new era of participatory journalism online with yet others advocating increased investment in quality journalism rather than free gifts and DVDs as the necessary cure for the current parlous state of newspapers Globally newspapers confront highly variable prospects reflecting their location in different market sectors countries and journalism cultures But despite this diversity they face similar challenges in responding to the increased competition from expansive radio and 24 hour television news channels the emergence of free Metro papers the delivery of news services on billboards pod casts and mobile telephony the development of online editions as well as the burgeoning of blogs citizen journalists and User Generated Content Newspapers revenue streams are also under attack as advertising increasingly migrates online This authoritative collection of research based essays by distinguished scholars and journalists from around the globe brings together a judicious mix of academic expertise and professional journalistic experience to analyse and report on the future of newspapers This book was published as special issues of Journalism Practice and Journalism Studies **The ^AOxford Handbook of Politics in Muslim Societies** Melani Cammett, Pauline Jones, 2022-02-22 The Oxford Handbook of Politics in Muslim Societies examines a wide range of topics concerning regimes and regime change electoral politics political attitudes and behavior beyond voting social mobilization economic performance and development outcomes and social welfare and governance The Handbook shifts focus away from the Arab world as the barometer of politics in the Muslim world recognizing that the Islamic world spans several regions including Africa Southeast Asia South Asia and Central Asia This expanded geography enables a thorough investigation of which relationships if any hold across Muslim majority states in different regions of the world *On Deaf Ears* George C. Edwards III, 2008-10-01 American presidents often engage in intensive campaigns to obtain public support for their policy initiatives This core strategy for governing is based on the premise that if presidents are skilled enough to exploit the bully pulpit they can successfully persuade or even mobilize public opinion on behalf of their legislative goals In this book George Edwards analyzes the results of hundreds of public opinion polls from recent presidencies to assess the success of these efforts Surprisingly he finds that presidents typically are not able to change public opinion even great communicators usually fail to obtain the public's support for their high priority initiatives Focusing on presidents personae their messages and the American public he explains why presidents are often unable to move public opinion and suggests that their efforts to do so may be counterproductive Edwards argues that shoring up previously existing support is the principal benefit of going public and that staying private negotiating quietly with elites may often be more conducive to a president's legislative success
