Martin Mobberley,2013-07-23 To British television viewers the name

Patrick Moore has been synonymous with Astronomy and Space Travel since he first appeared on *The Sky at Night* in 1957. To amateur astronomers he has been a source of inspiration, joy, humour and even an eccentric role model since that time. Most people know that his 55 years of presenting *The Sky at Night* is a world record, but what was he really like in person? What did he do away from the TV cameras in his observatory and within the British Astronomical Association, the organisation that inspired him as a youngster? Also precisely what did he do during the War Years, a subject that has always been shrouded in mystery? Martin Mobberley, a friend of Patrick Moore's for 30 years and a former President of the British Astronomical Association, has spent ten years exhaustively researching Patrick's real life away from the TV cameras. His childhood, RAF service, tireless voluntary work for astronomy and charity and his endless book writing are all examined in detail. His astronomical observations are also examined in unprecedented detail along with the battles he fought along the way and his hatred of bureaucracy and political correctness. No fan of Sir Patrick Moore can possibly live without this work on their bookshelf.

Zech, 2013-12-14. *Astronomy and Astrophysics Abstracts* which has appeared in semi-annual volumes since 1969 is devoted to the recording, summarizing and indexing of astronomical publications throughout the world. It is prepared under the auspices of the International Astronomical Union according to a resolution adopted at the 14th General Assembly in 1970. *Astronomy and Astrophysics Abstracts* aims to present a comprehensive documentation of literature in all fields of astronomy and astrophysics. Every effort will be made to ensure that the average time interval between the date of receipt of the original literature and publication of the abstracts will not exceed eight months. This time interval is near to that achieved by monthly abstracting journals compared to which our system of accumulating abstracts for about six months offers the advantage of greater convenience for the user. Volume 31 contains literature published in 1982 and received before July 15 1982, some older literature which was received late and which is not recorded in earlier volumes is also included. We acknowledge with thanks contributions to this volume by Dr J. Bouska, Prague, who surveyed journals and publications in Czech and supplied us with abstracts in English. *The Publishers' Trade List Annual*, 1983.

[Women in Early British and Irish Astronomy](#) Mary Brück, 2009-07-25. Careers in astronomy for women as in other sciences were a rarity in Britain and Ireland until well into the twentieth century. The book investigates the place of women in astronomy before that era recounted in the form of biographies of about 25 women born between 1650 and 1900 who in varying capacities contributed to its progress during the eighteenth, nineteenth and early twentieth centuries. There are some famous names among them whose biographies have been written before now, there are others who have received less than their due recognition while many more occupied inconspicuous and sometimes thankless places as assistants to male family members. All deserve to be remembered as interesting individuals in an earlier

opportunity poor age Placed in roughly chronological order their lives constitute a sample thread in the story of female entry into the male world of science The book is aimed at astronomers amateur astronomers historians of science and promoters of women in science but being written in non technical language it is intended to be of interest also to educated readers generally
