Annals of Theoretical Psychology Joseph R. Royce,Leendert P. Mos,2013-11-11 As such things happen several manuscripts in the present volume were under review prior to the ones that appeared in Volume I of the Annals A major difficulty encountered in the preparation of these volumes apart from working up to three years in advance of publication is elic iting appropriate commentary If this format is to succeed the com mentary must be both engaging to the reader and satisfying to the author It is not yet clear how successful we have been in this regard and indeed we do not feel bound to publish commentary with each manuscript that is accepted for publication Nevertheless we do invite readers commentaries on published materials The contributions by Jan Smedslund and Benjamin Wolman in this volume have been through an inordinately long publication lag We have been in receipt of both manuscripts since early in 1981 and Dr Smedslund especially has since clarified and advanced his views else where in print K B Madsen and Joseph Rychlak submitted their man uscripts in the fall of 1981 while Michael Hyland and J Philippe Rushton had first drafts of their manuscripts accepted for publication in the fall of 1982 We are grateful to our contributors for their expressed com mitment to the Annals and assure potential contributors that the delay in publication is a mere matter of getting the series off the ground

[Cartography Past, Present and Future](#) D.W. Rhind,D.R. Fraser Taylor,2013-10-22 Making maps dates back at least four thousand years and it is widely recognised that many maps are of great historical value and present a skilled method of summarising the real world on a sheet of paper Less well known is the judgement involved in the selection and simplification of features the complex transformation of space and the exacting standards which are needed in cartography This book is primarily a tribute to Professor F J Ormeling former President and Secretary Treasurer of the ICA and gives a wide ranging review of the current status of cartography how this status was attained and the way in which the subject is expected to evolve over the next decade It is composed of two main sections In the first the present state of cartography in different countries is examined The second section is a thematic view in which some of the major issues and developments in cartography are discussed in turn including art and science in cartography the character of historical cartography the role of

map making in developing countries the impact of a possible ideal computer mapping facility and how cartography has changed in recent years There are international contributions from authors distinguished and internationally recognised in cartography and related fields and who have had a significant input to the ICA **IIC** ,1985 **U.S. Government Books** ,1985 **Land Use Transition in Urbanizing Areas** Ralph E.
