General Accounting Office, 1986 *1986-1987* John Paxton, 2021-06-21 No detailed description available for 1986 1987 *Primary Commodities* International Monetary Fund, 1987-01-01 This paper provides an analysis of recent developments relating to the major nonfuel primary commodities entering international trade Particular attention is given to market price movements in 1986 and to the factors underlying these movements In the case of some agricultural markets changes in commodity specific policies of industrial countries have also had the effect of increasing supplies and competition for markets The other factors including rates of inflation exchange rate changes and interest rates have also influenced commodity prices at least when measured in nominal dollar terms The evolution of economic activity in the industrial countries is most relevant in explaining movements in prices of metals and other raw materials used in industry while movements in prices of food and beverages are better explained by supply factors Changes in production capacity resulting from investment decisions made in earlier years can have an important influence on commodity prices **World Economic Outlook, April 1985** International Monetary Fund. Research Dept., 1985-01-01 This paper highlights that the performance of the world economy in 1984 turned out to be considerably better than had been expected at the beginning of the year Output grew robustly in the industrial countries especially in the United States and Japan inflation continued to decline and developing countries saw a noteworthy improvement both in their balance of payments position and in their domestic growth performance Fears that the debt situation might deteriorate did not materialize *Agriculture, rural development, and related agencies appropriations for 1986* United States. Congress. House. Committee on Appropriations. Subcommittee on Agriculture, Rural Development, and Related Agencies, 1985 **International Commodity Policy** Roland Herrmann, Kees Burger, Hidde P. Smit, 2023-04-01 Originally published in 1993 this book provides an excellent analysis of commodity policies internationally during the late 20th Century It discusses 2 major methods of market regulation price stabilization based on buffer stocks or export quotas and compensatory finance The authors analyse whether major commodity policies have reached their primary objectives and to what extent they have had economic side effects Discussion of more general policy issues centres around three international commodity agreements for coffee rubber and cocoa The authors also look at the policies adopted by individual nations to regulate commodity trading and assess to what extent they have reached their objectives A discussion of the

intervention of the International Monetary Fund and STABEX assesses the degree of stability they can provide in a highly volatile and variable environment. Nearly 30 years later, volatile world commodity markets are still a major issue in the policy dialogue. Although topics, policy instruments, and concepts have changed, this book remains a fundamental contribution to the study of international commodity policy. It will be of great interest to students of commodity policy and economic development and economists in national and international organizations dealing with market stabilization.
