and communities of faith today are rediscovering evangelism as an essential aspect of the church's mission Many of the resulting books in the marketplace however have a hands on orientation often lacking serious theological engagement and reflection Bucking that how to trend *The Study of Evangelism* offers thirty groundbreaking essays that plumb the depths of the biblical and theological heritage of the church with reference to evangelistic practice Helpfully organized into six categories these broad diverse writings lay a solid scholarly foundation for meaningful dialogue about the church's practice of evangelism **Institutions of Art** Robert J. Yanal, 2010-11 George Dickie has been one of the most innovative influential and controversial philosophers of art working in the analytical tradition in the past twenty five years Dickie's arguments against the various theories of aesthetic attitude aesthetic perception and aesthetic experience virtually brought classical theories of the aesthetic to a halt His institutional theory of art was perhaps the most discussed proposal in aesthetics during the 1970s and 1980s inspiring both supporters who produced variations on the theory as well as passionate detractors who thought the theory thoroughly wrongheaded Dickie has also written widely on the history of aesthetics and his work ranks among the best examples of analytic aesthetics The philosophy of George Dickie continues to provoke reaction and reflection The essays in this collection pay homage not only to Dickie's ideas but also to his influence A brief biography of George Dickie and a bibliography of his works complete the volume

Inhaltsangabe Introduction The ongoing process of the globalization of markets in context with the innovation of technologies
caused that more and more companies expand their market activities internationally At the same time product offers at
saturated markets are qualitative more and more alike and thus exchangeable A differentiation just through product
attributes is not possible anymore Advertising became a key function in marketing as communication through advertising
provides the only opportunity for companies to differentiate from their competitors Both the globalization of markets and the
great importance of advertising raise returning discussions whether global advertising and its planning should be
standardized or not Standardization means that an identical advertisement can appeal different cultures in the same way On
the one hand it can not be denied that things like ethnical cuisine tourism and worldwide media lead to an exchange between
cultures On the other hand it is questionable if this exchange causes an automated homogenization of cultures In 1983
Theodore Levitt already was dealing with the necessity of standardized advertising in the course of globalization However
Levitt asserted that a standardization of advertising is necessary but did not go into detail how this can be realized best
Furthermore he did not consider the enormous impact of culture on the perception and behavior of people and the resulting
difficulties to use one single advertising campaign across cultures In addition to that different national advertising
restrictions have to be taken into account As it is assumed that the trend to globalization will continue and strengthen the
issue of global advertising is always relevant In the following thesis the focus is exact on the obstacles of standardized
advertising in front of the cultural background Furthermore characteristics of various approaches to overcome cultural
differences and their suitability for standardized advertising will be examined Inhaltsverzeichnis Table of Contents List of
