Communication Luigi Rizzo, Serge Fdida, 2004-06-22 Enabling group communication is one of the major challenges for the future Internet Various issues ranging from services and applications to protocols and infrastructure have to be addressed Moreover they need to be studied from various angles and therefore involve skills in multiple areas

COST264 was created to contribute to this international effort towards group communication and related technologies The European COST framework is ideal for establishing a new community of interest providing an open forum for ideas and also supporting young researchers in the field The COST264 action officially started in late 1998 aims at leveraging the European research in this area and creating intensive interaction at the international level To this purpose COST264 decided to organize an annual technical workshop the International Workshop on Networked Group Communication NGC 99 in Pisa is the first event of the series Despite this being the first workshop and despite the very short time between the Call for Papers and the deadline for submissions and the other conflicting and more established events the Call for Papers of NGC 99 was highly successful we received 49 papers of which 18 were selected to compose the basis of the technical program We hope you will enjoy our paper selection which is the VI Preface core of these proceedings and addresses important issues in the research and development

of networked group communication In addition to refereed contributions we scheduled two keynote speakers Christophe Diot and Steve Deering and four invited talks by Ken Birman Cornell Bob Briscoe BT Radia Perlman SUN Tony Speakman CISCO
