The Scientific Chronology of the Year 1839 ... a Sign of the Near Approach of the Kingdom of God. [With "A Supplement ... Comprising the Arithmetical Solution and Chronological Application of the Number 666."] William CUNINGHAME (of Lainshaw.),1840 *A History of the Apocalypse* Catalin Negru,2023-01-20 Religion For thousands of years this thing has dictated which people should live and which people should die what shape our buildings should have or what colors our garments should contain what food people should eat or what words people should speak If religion is the opium of the masses then beliefs about the end of the world are like overdoses People touched by such beliefs no longer rely on a hidden personal and intimate god contemplated upon from the safe distance of the beating human heart They live with the promise of divine intervention at a grand scale on the current coordinates of space and time This can be an exceptional motivator and a game changer in terms of civil obedience both at an individual and collective level In the name of an immediate and palpable deity people can commit shocking cruelties However such belief can also account for some of the most exceptional social developments in human history *Prophecy Flash!* ,1999 *A Supplement to the Scientific Chronology of the Year 1839, ...* William Cuninghame,1840 *A Dissertation on the Seals and Trumpets of the Apocalypse, and the prophetical period of twelve hundred and sixty years* William CUNINGHAME (of Lainshaw.),1843 *Encyclopedia of Cryptozoology* Michael Newton,2016-10-05 On every continent and in every nation animals unrecognized by modern science are reported on a daily basis People passionately pursue these creatures the name given to their field of study is cryptozoology Coined in the 1950s the term literally means the science of hidden animals When the International Society of Cryptozoology ISC was formed in 1982 the founders declared that the branch of science is also concerned with the possible existence of known animals in areas where they are not supposed to occur either now or in the past as well as the unknown persistence of presumed extinct animals to the present time or to the recent past what makes an animal of interest to cryptology is that it is unexpected This reference work presents a flesh and blood view of cryptozoology Here 2 744 entries are listed the majority of which each describe one specific creature or type of creature Other entries cover 742 places where unnamed cryptids are said to appear profiles of 77 groups and 112 individuals who have contributed to the field descriptions of objects and events important to the subject and essays on cryptotourism and hoaxes for example Appendices offer a timeline of zoological discoveries annotated lists of movies and television series with cryptozoological themes a list of crypto fiction titles and a list of Internet websites devoted to cryptozoology **Who's Who of Canadian Women, 1999-2000** Gillian Holmes,1999-06-01 Who s Who of Canadian Women is a guide to the most powerfuland innovative women in Canada Celebrating the talents and achievement of over 3 700 women Who s Who of Canadian Women includes women from all over Canada in all fields including agriculture academia law business politics journalism religion sports and entertainment Each biography includes such information as personal data education career history current employment affiliations interests and honours A special

The Animation Studies Reader Nichola Dobson, Annabelle Honess Roe, Amy Ratelle, Caroline Ruddell, 2018-10-18 The Animation Studies Reader brings together both key writings within animation studies and new material in emerging areas of the field The collection provides readers with seminal texts that ground animation studies within the contexts of theory and aesthetics form and genre and issues of representation The first section collates key readings on animation theory on how we might conceptualise animation and on some of the fundamental qualities of animation New material is also introduced in this section specifically addressing questions raised by the nature style and materiality of animation The second section outlines some of the main forms that animation takes which includes discussions of genre Although this section cannot be exhaustive the material chosen is particularly useful as it provides samples of analysis that can illuminate some of the issues the first section of the book raises The third section focuses on issues of representation and how the medium of animation might have an impact on how bodies gender sexuality race and ethnicity are represented These representations can only be read through an understanding of the questions that the first two sections of the book raise we can only decode these representations if we take into account form and genre and theoretical conceptualisations such as visual pleasure spectacle the uncanny realism etc

Consumable Metaphors Ceri Crossley, 2005 This book studies the various definitions of animal nature proposed by nineteenth century currents of thought in France It is based on an examination of a number of key thinkers and writers some well known for example Michelet and Lamartine others largely forgotten for example Gleizes and Reynaud At the centre of the book lies the idea that knowledge of animals is often knowledge of something else that the primary referentiality is overlaid with additional levels of meaning In nineteenth century France thinking about animals their future and their past became a way of thinking about power relations in society for example about the status of women and the problem of the labouring classes This book analyses how animals as symbols externalize and mythologize human fears and wishes but it also demonstrates that animals have an existence in and for themselves and are not simply useful counters functioning within discourse

Christ and the Maya Calendar Kevin Dann, 2009-03 Cosmic Christianity describes the relationship between the earthly and supra earthly cosmic worlds by showing the relationship between the cosmos as expressed in the movements of the stars and the activities of Christ during his three years of ministry on Earth The gesture of each astrological planet during those years is worked out and correlated with specific acts of the Christ as recorded in the Gospels The apparent looping movements of Mercury for example are

connected with the seven signs of St John's gospel The author goes on to explore the many ways in which these healing acts which have been inscribed in the heavens continue to work in evolution through the events of history and through our individual human lives By studying this we begin to understand our responsibility for developing the new Christian mysteries and consequently renewing the starry cosmos Sucher presents a real foundation for modern star wisdom Topics include the evolution of cosmology the origins of the planetary symbols our new relationship to the stars as revealed in human lives and historical events and the role of the Archangel Michael in our individual relationship to the stars This is an excellent place to begin one's study of the stars and their meaning for both our individual lives and for the world **Twentieth Century Fox**
