Knechtle, Christian P. Larsen, Joren C. Madsen, Thomas C. Pearson, Steven A. Webber, 2014-07-21 Brought to you by the world's leading transplant clinicians, *Textbook of Organ Transplantation* provides a complete and comprehensive overview of modern transplantation in all its complexity, from basic science to gold standard surgical techniques to post-operative care and from likely outcomes to considerations for transplant program administration, bioethics and health policy. Beautifully produced in full color throughout and with over 600 high-quality illustrations, it successfully provides a solid overview of what transplant clinicians and surgeons do and with topics presented in an order that a clinician will encounter them. Presents a holistic look at transplantation, foregrounding the interrelationships between transplant team members and non-surgical clinicians in the subspecialties relevant to pre and post-operative patient care such as gastroenterology, nephrology and cardiology. Offers a focused look at pediatric transplantation and identifies the ways in which it significantly differs from transplantation in adults. Includes coverage of essential non-clinical topics such as transplant program management and administration, research design and data collection, transplant policy and bioethical issues. *Textbook of Organ Transplantation* is the market-leading and definitive transplantation reference work and essential reading for all transplant surgeons.
